

MWLL Installation Guide

08/22/13

Hi guys and welcome to the MWLL Installation guide. This guide is intended to provide you with some simple steps to get MWLL installed on your machine with the minimum of hassle, and also provides you some pre established configuration files that should ensure certain functionalities work as intended as soon as you launch the game.

Step 1:

First of all, you will need to download the MWLL complete installation package. This client was put together by the community, and includes both the MWLL 7.1 final release patch, and a copy of the Crysis Wars demo, that enables you to play on the majority of community servers without having to spend a single dollar on the game. For clarification, any servers that will be launched from today onwards (08/22/13) will be set up in a way so that you can play on them.

Download from here:

<http://cjlw.dyndns.biz/mwll/MWLL-0.7.1+CW.zip> - Germany

<http://mw-ll.org/MWLL-0.7.1+CW.1.1.zip> - Chicago

<http://lataamo.eu/MWLL/new/MWLL-0.7.1+CW.zip> - Finland

And here's a torrent location:

<http://mw-ll.org/MWLL-0.7.1+CW.1.1.torrent> (Any seeding would be much appreciated!)

Whilst this is downloading, look over the MWLL wiki for beginner tips and control guides.

http://wiki.mechlivinglegends.net/index.php?title=Main_Page

Instructions:

For zip file:

1. Download MWLL-0.7.1+CW.zip
2. Extract the files to a folder (we would recommend using 7Zip - the built in windows extractor has been reported to handle large files poorly)
3. Ensure that the four .bin files are in the same folder as the .exe
4. Run the MWLL+CW_setup.exe

For torrent:

- Just run the .exe

If you're interested in learning how to rank up faster and progress to the better assets, check out this video here:

For a full tutorial video series, albeit a little out of date, check this video series here:

<http://www.youtube.com/watch?v=RPneKBl7Rk>

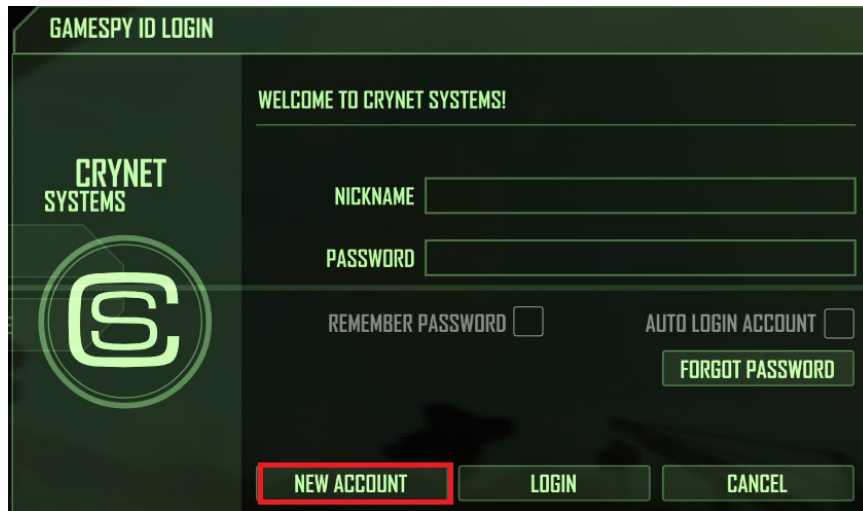

Step 2:

When this is complete, run the MWLL.Launcher.exe to bring up the game launcher. Then, launch the game. Be aware, MWLL shows a black screen on launch longer than some games, but it will launch in time.

When the game loads up, attempt to get into on the 'profile' button, and create a profile. Do this with the username you would like to use in game.

Once you've done this, click on the multiplayer tab, then internet games. The game will attempt to connect to Crynet server, and ask for a gamespy account. Don't worry! Even though the servers are shut down, you can still get through this stage painlessly.

First of all, click the create account button here :

The image shows the 'GAMESPY ID LOGIN' window. On the left is the 'CRYNET SYSTEMS' logo, a stylized 'S' inside a circle. The main area has a dark background with a faint image of a soldier. The text 'WELCOME TO CRYNET SYSTEMS!' is at the top. Below it are input fields for 'NICKNAME' and 'PASSWORD'. There are checkboxes for 'REMEMBER PASSWORD' and 'AUTO LOGIN ACCOUNT'. A 'FORGOT PASSWORD' button is to the right of the password field. At the bottom are three buttons: 'NEW ACCOUNT' (highlighted with a red box), 'LOGIN', and 'CANCEL'.

GAMESPY ID LOGIN

WELCOME TO CRYNET SYSTEMS!

CRYNET SYSTEMS

NICKNAME

PASSWORD

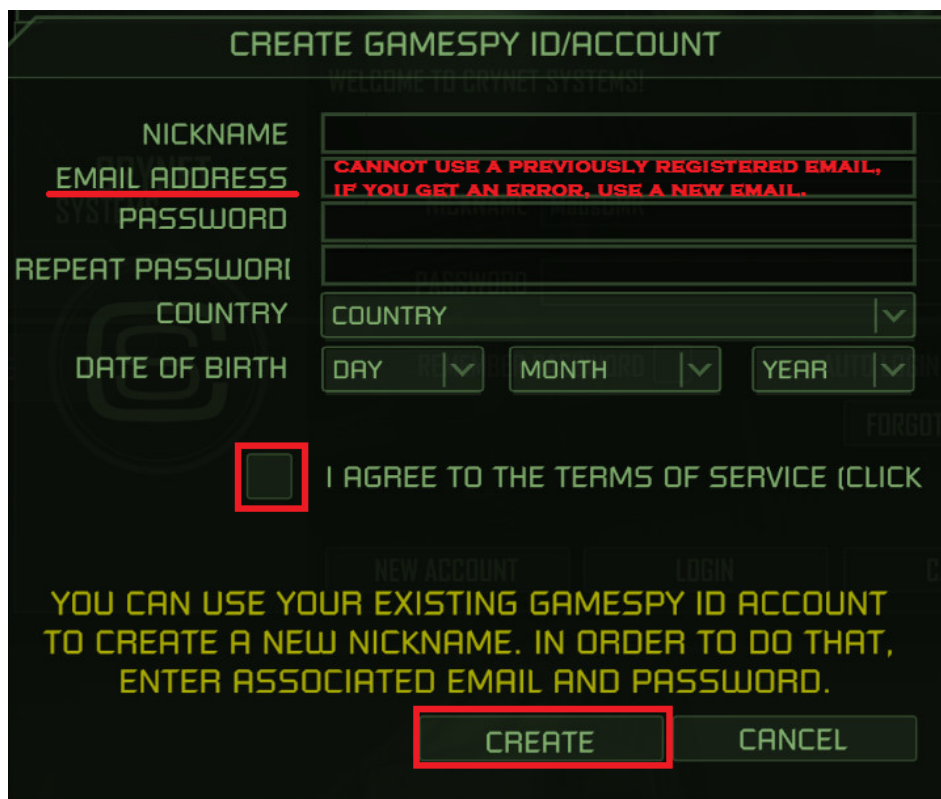

REMEMBER PASSWORD ☐

AUTO LOGIN ACCOUNT ☐

FORGOT PASSWORD

NEW ACCOUNT LOGIN CANCEL

Then, proceed to fill in your account details, anything here is fine, just make sure you can remember the details for when you need to log in this one time. As long as you select remember password and auto log in, you will never have to do this again.

The image shows the 'CREATE GAMESPY ID/ACCOUNT' window. It has a dark background with a faint image of a soldier. The text 'WELCOME TO CRYNET SYSTEMS!' is at the top. Below it are input fields for 'NICKNAME', 'EMAIL ADDRESS' (highlighted with a red box), 'PASSWORD', and 'REPEAT PASSWORD'. There is a dropdown menu for 'COUNTRY' and three dropdown menus for 'DATE OF BIRTH' (DAY, MONTH, YEAR). Below these is a checkbox (highlighted with a red box) and the text 'I AGREE TO THE TERMS OF SERVICE (CLICK HERE)'. At the bottom are three buttons: 'NEW ACCOUNT', 'LOGIN', and 'CANCEL'. A 'CREATE' button is highlighted with a red box. Below the buttons is a yellow text box with the following text: 'YOU CAN USE YOUR EXISTING GAMESPY ID ACCOUNT TO CREATE A NEW NICKNAME. IN ORDER TO DO THAT, ENTER ASSOCIATED EMAIL AND PASSWORD.'

CREATE GAMESPY ID/ACCOUNT

WELCOME TO CRYNET SYSTEMS!

NICKNAME

EMAIL ADDRESS

PASSWORD

REPEAT PASSWORD

COUNTRY

DATE OF BIRTH

DAY MONTH YEAR

☐ I AGREE TO THE TERMS OF SERVICE (CLICK HERE)

NEW ACCOUNT LOGIN CANCEL

CREATE

YOU CAN USE YOUR EXISTING GAMESPY ID ACCOUNT TO CREATE A NEW NICKNAME. IN ORDER TO DO THAT, ENTER ASSOCIATED EMAIL AND PASSWORD.

If you get 'invalid username or email' error, try another email address, as one previously

registered to gamespy may be causing conflicts. If you still get that error, try making a new email account, or use a random but valid email address - such as randomkeys@gmail.com

After filling in all details, click create, and log in with the details you provided. Then, following this, quit out of the game.

Step 3:

Open your My Documents folder, and go to Documents\My Games\Crysis Wars\Profiles\yournewprofilenamehere. Then, replace the active_actionmaps_original and joystick_original with the files located in the collection below.

<https://www.dropbox.com/s/3ss0lrrxsg1apvc/MWLL%20file%20collection.rar>

This will provide you with a set of tested joystick and keyboard settings that fit in fairly closely with previous experiences you may have had with a mechwarrior title. A couple of key differences to consider are as follows:

Get in/out of an asset - G	Buy equipment/asset - ,	Free Arms - L Alt
Override shutdown - F	Flush Coolant - C	MASC/Boost - L Shift
Toggle Radar Passive/active - R	Target under reticule - Q	Target closest enemy - E

Step 4:

The final thing you will need to do is to place the autoexec.cfg file located in the collection above, into your crysis wars folder. This should be located here :

Program Files (x86)\Electronic Arts\Crytek\Crysis Wars

And that's all you need to start playing!

Be sure to join our public TS3 server at ts30.gameservers.com:9266 , password MWLLrocks

We look forward to seeing you online!

Thanks to all those that contributed to making this document possible, through the efforts of the combined installer, MWLL Wiki, numerous video guides, and the CCC graphic enhancements!

If you'd like to change your graphics settings some more, please read below to see how to edit them using the CCC package.

Graphics changes

This file is setup to provide some beneficial improvements to Crysis graphics through a program called CCC. If you want to change the settings of this autoexec, as it currently is set at level 4, high, then download the program below, run it and select the settings you would like, ranging from 1-5. Once you've done this, remember to replace autoexec with the newly generated one, but don't forget to include this important line of code in the file.
