

Next Steps

Date: November 20, 2023

The Curriculum Committee Chair will give an update on the minutes and next steps to the board. The committee started with an update on Mystery Science. Christine Hesler shared the website staff access and reviewed how the process works. Members were also able to see a kit that was built for classroom teachers. Financially, creating these kits make more sense then purchasing from the vendor.

This committee meeting combined October and November agendas. The committee members heard from Kindergarten, Grade 1, Grade 2 and Grade 3 teachers from Windham Primary School and Raymond Elementary.

Teacher shared the following:

- What is going well in their grade level
- What are some wishes and or needs
- Do you have any concerns you wish to share with the board?
Any policy implications?

Each grade level representative has their reflections linked into the minutes of this meeting.

Next Meeting is January 8th and the committee has invited Gr. 4 and 5 teachers. Christine Hesler will also share with the committee the new Maine Learning results for PE and Health.
