

# AP Environmental Science Textbook Exploration

## Visualizing Key Concepts from Chapter 1 and 2

### Explore

Please take some time to explore these creative resources. A *YouTube search can be a great way to quickly learn more about a resource*. You will be using these resources to create and share concepts from the textbook throughout the year..

- [Google Drawings](#)
- [Piktochart](#)
- [Thinglink](#)
- [Canva](#)
- [Vengage](#)
- [Easel.ly](#)
- [Lucidpress](#)
- [Google Slides](#)

### Learn

Select one of the resources and create a simple visual representation of something important to you. If you need help, be sure to explore any help resources connected to the tool or search YouTube for help.

Learn how to share your creation and paste the public url below.

Why did you choose the resource you used?

### Plan

Use the print textbooks in the classroom or the digital text to explore chapter 1 and 2. Start to brainstorm a list of key concepts, vocabulary, and ideas connected to the chapters.

Share some of your key takeaways from the first two chapters below.

After completing your plan, have a conversation with someone near you comparing your takeaways.

### Create - These 5 Things

Chose 5 concepts that you believe are essential to understand from the first two chapters. Create an interactive visual that can be used to explain and clarify these concepts.

- Tips**
- **Maximize the visual and minimize the text as much as possible.**
  - **Make it interactive where possible. Include links to additional resources and videos.**
  - **If the tool isn't working for you, try something else.**

### Share

Share a public link or upload in our Google+ Community - Category is Textbook. Also add link here.

Turn this document into Google Classroom after you share the link to your 5 Things in Google+
