

Privacy Policy – Etymologist

Etymologist does not collect, store, or share any personal information.

The extension only responds when you double-click a word on a webpage. It sends that word (and only that word) to a remote API to fetch its meaning, origin, and synonyms, which are shown in a popup.

No page content, browsing history, or personally identifiable data is collected.
No data is sold, shared with third parties, or used for advertising.
