Abilities:

Invuln: 4+, Supreme Commander, Deadly Demise D3, Deep Strike, Feel No Pain 6+

Architect of Destruction: When a friendly Heretic Astartes unit is within 6" of this model, that unit's weapons gain the Ignores Cover keyword. Also, if a friendly unit being affected by this aura is targeting an enemy unit with ranged attacks, if that enemy unit is WHOLLY inside the footprint of a terrain piece or would gain the benefit of cover from an enemy Fortification, re-roll wound rolls of 1 against that enemy unit.

Siege Lord: At the beginning of each battle round, choose one of 3 auras in the Siege Lord section. This model gains that ability.

- Spiteful Endurance (Aura): When a friendly Heretic Astartes unit is within 6" of this model, that unit gets Feel No Pain 6+.

- Flames of Spite: At the start of your command phase, select one friendly Heretic Astartes unit from your army within 6" of Perturabo. That unit's ranged weapons gain Indirect Fire (until the end of the shooting phase) as long as they are targeting an enemy unit that Perturabo can see.

- Logos Defense Array: One friendly Heretic Astartes unit within 12" of this model can be the target of the Smokescreen stratagem for 0cp this battle round, even if that stratagem has already been used on a different unit this battle round and even if they do not have the Smokescreen keyword.

Keywords: Monster, Character, Epic Hero, Chaos Undivided, Chaos, Daemon, Heretic Astartes, Primarch, Perturabo
