

# **ACTIVITY - PHYSICAL LANDFORMS OF THE CONTINENTS.**

## **EUROPE.**

- **DESCRIPTION**

It is located in the Northern Hemisphere. It is separated from Asia by the Caucasus and Ural mountains and the Caspian Sea.

Europe is divided into three big areas: The Great European Plain, the oldest mountain ranges and the Alpine Mountains.

It has an **irregular coastline with** many capes, gulfs, peninsulas, islands, etc.

### **ACTIVITIES.**

1. Copy on the back of the map the main features of the European continent.
2. Color the map of Europe according to the key of the physical map of page 119.
3. Locate the landforms of this [table](#).

## **ASIA**

- **DESCRIPTION**

It is located in the Northern Hemisphere. It is separated from Europe by the Caucasus and Ural mountains and the Caspian Sea. It is separated from Africa by the Red Sea and the Suez Canal.

Asia has a high average altitude because it has high plateaus (Tibet) and very tall mountains (Himalayas), although there are also big plains and depressions.

### **ACTIVITIES.**

4. Copy on the back of the map the main features of the Asian continent.
5. Color the map of Asia according to the key of the physical map of page 119.
6. Locate the landforms of this [table](#).

## **OCEANÍA**

- **DESCRIPTION**

It is the smallest continent in the world and consists of thousands of islands. It is located to the southeast of Asia in the Pacific and Indian oceans.

There are four main islands: Australia, New Guinea and the two islands of New Zealand.  
There are three big regions of small islands: Micronesia, Melanesia and Polynesia.

### **ACTIVITIES.**

7. Copy on the back of the map the main features of the Asian continent.
8. Color the map of Asia according to the key of the physical map of page 119.
9. Locate the landforms of this [table](#).

## **ÁFRICA**

- **DESCRIPTION**

The equator divides Africa in two halves. It is surrounded by the Indian and Atlantic oceans.  
The Strait of Gibraltar separates Africa from Europe. It is separated from Asia by the Red Sea and the Suez Canal.

We find jungles close to the equator, savannahs between the equators and tropics and big deserts in the interior and close to the tropics.

### **ACTIVITIES.**

10. Copy on the back of the map the main features of the African continent.
11. Color the map of Africa according to the key of the physical map of page 119.
12. Locate the landforms of this [table](#).

## **AMÉRICA**

- **DESCRIPTION**

Do it by yourself with the help of the textbook.

### **ACTIVITIES.**

13. Copy on the back of the map the main features of the African continent.
14. Color the map of Africa according to the key of the physical map of page 119.
15. Locate the landforms of this [table](#).
