

## Scorpio

(Nov 17 – Dec 16)

**Work and finances:** Partnership-related businesses will be busy this year. A financial situation will go up and down, but nothing bad will come from it. Scorpions are likely to sign a new contract related to society, services, and entertainment. The work in partnership isn't good this year as the routine work and international affairs will get better in the third quarter. For those wanting to change to a new job, this is the right time as well. Your work will be successful in September. Travelling abroad is good in October, but you will spend a lot of money between November and December. Scorpions should not buy a new house or new car this year.

**Health:** Don't worry about road accidents but you'll need to take care of your health. Watch out for having a relapse in the second quarter. You may have digestive diseases, an excretory system disorder, haemorrhoids, acute cystitis, cervicitis or ovarian disease. You have to see a doctor and take regular health check-up programmes.

**Relationships:** Your love life isn't smooth and not so romantic. Both of you may be jealous of each other and it affects your feelings. You will face some health and love problems during April to June.

**Luck:** Friends and society will bring some good things to your life. You will get a windfall in the third quarter.
