

Always choose a memorable password!

This was just too good not share.

**A lady helps her man install a new computer.
Once it is completed,
she tells him to select a password - a word that he'll always
remember.**

**He looks at his wife and with a macho
gesture and a wink in his eye and
types in 'penis'.**

As he hits "enter" to validate the selection,

his wife collapses with laughter and

rolls on the floor in hysteria

The computer had replied:

TOO SHORT - ACCESS DENIED!
