

# Project Name

proposed on : 01.03.2019

Your Name Here

IRC, Telegram, Jabber name (or similar)

GitHub name and URL (or similar)

Email: [name@example.com](mailto:name@example.com)

Blog address (if exist/you want to share it)

CV link (if exist/you want to share it)

## Abstract

Here you describe the short introduction into the project subject.

## Motivation

Why do you want to participate in RSoC this year, and why this task?

Would you like to stay involved in the project after the RSoC done? If yes - please explain shortly why.

If this task will be unavailable - would you like to take another one? If yes - please specify which one.

## Specifications

- Location and timezone.
- When you'll need to start work and when - you can't do this.
- Where you're going to track the status - is this just GitHub, or your personal blog, or any other option?
- Where are you going to discuss your task with mentors - using text chats, like IRC/Telegram/Slack/etc, or using real-time audio/video communication.
- How much time you're going to invest in this task.

## Major Goals

The minimum requirements for 1st term, 2nd term and final term evaluations should be covered in this section. Adding more than those goals is possible, it's up to you.

## Optional Goals

Additional goals, which you want to achieve during this summer.

## Timeline

Please, write down plan here, with interval of half a week or the whole week. Splitting wisely the whole task is the key point of following a tight schedule and a success in RSoC overall. If you specify some particular way to do the part of the task - please add a link/reference to the paper/another program/github issue, that were the source of information for the decision to do it in this specific way.

## Micro-Tasks and contributions

Write here your previous contributions to the radare2 or related projects and microtasks solved. Use the short description and links to the Pull Requests, fixed issues, wiki pages or GitHub repositories.

## RSoC/GSoC experience

Have you participated in RSoC or GSoC previous years? What projects and tasks were your choice and why.
