

What do i need to learn in this unit?

Once i know about the geography of Spain, i'm going to learn about the geography of the continent of Europe.

I need to know and explain lots of things about the geography of this continent that surrounds Spain:

Where is Europe located, how is surrounded by **seas, oceans and islands**, and what are the main landscapes we can find in Europe: **Plateaus, mountain chains and ranges, main peaks, river basins, capes, straits, watersheds and rivers.**

You need to know as well, where are these landscapes, and what do they mean: **A peninsula, an island, a gulf, a cape, a fjord and a strait.**

And finally of course, you should know as you did with Spain, the main characteristics of the **climates** in Spain.

SEAS AND OCEANS: Arctic ocean, Atlantic ocean, North sea, Baltic sea, Black sea, Caspian sea, Barents Sea.

PLATEAUS: Great European Plain and Eastern European plain.

MOUNTAINS CHAINS and RANGES: Escandinavas, Urales, Cárpatos, Alpes, Apeninos, Pirineos and Cáucaso.

MOUNTAINS AND PEAKS: Mont Blanc, Oimpo, Etna, Elbrus.

PENINSULAS: Iberian Peninsula, Jutlandia Peninsula, Scandinavian Peninsula.

ISLANDS: Iceland, Great Britain, Ireland, Sicilia, Malta, Córcega and Cyprus.

WATERSHEDS AND RIVERS: Atlantic: Sena, Rhin, Thames, Loira,

Mediterranean: Po, Rhone.

Black sea: Danubio.

Caspian sea: Volga

Arctic: Pechora.

CLIMATES: Oceanic, Continental, Mediterranean, Mountain, Polar.

VEGETATION.
