01 Health and safety procedures

01.4 Children's bathrooms/changing areas

- Children are provided with a peg to keep their bag from home for spare clothing and nappies/pants.
- Floor surface is used when changing children. Staff should not have to lift heavy toddlers on to waist high units.
- Changing mats are cleaned and disinfected in baby change areas.
- Disposable nappies/trainers are cleared of solid waste and placed in nappy disposal units.
- Staff use single use gloves and aprons to change children and wash hands when leaving changing areas. Please note that gloves are not always required for a wet nappy if there is no risk of infection, however, gloves are always available for those staff who choose to wear them for a wet nappy. Gloves are always worn for a 'soiled' nappy.
- Staff never turn their backs on or leave a child unattended whilst on a changing mat.
- Changing areas or stands are provided for older (disabled) children, if required.
- Changing mats used for children are covered in tissue roll for each change and cleaned between each child.
- Changing mats are disinfected after each change.
- Anti-bacterial spray is not used where residue may have direct contact with skin.
- Anti-bacterial sprays used in nappy changing areas are not left within the reach of children.
- Natural or mechanical ventilation is preferred, however chemical air fresheners are only used if absolutely necessary and not in the presence of the children.
- All other surfaces are disinfected daily.

Children's toilets and wash basins

- Children's toilets are cleaned twice daily using disinfectant cleaning agent for the bowls (inside and out), seat and lid, and whenever visibly soiled.

- Toilet flush handles are disinfected daily.
- Toilets not in use are checked to ensure the U-bend does not dry out and are flushed every week. Taps not in use are run for several minutes every two to three days to prevent infections such as Legionella.
- There is a toilet brush available for children's toilets. This is stored in the cleaning cupboard, along with a separate cleaning cloth.
- Cubicle doors and handles (or curtains) are washed weekly.
- Children's hand basins are cleaned twice daily and whenever visibly soiled, inside, and out using disinfectant cleaning agent. Separate cloths are used to clean basins etc. and are not interchanged with those used for cleaning toilets. Colour coded cloths are used.
- Mirrors and tiled splash backs are washed daily.
- One use flannels/paper towels are provided for drying hands.
- Bins are provided for used flannels and are emptied and washed daily.
- All bins are lined with plastic bags.
- Staff who clean toilets wear rubber gloves.
- Staff changing children wear gloves and aprons as appropriate.
- Wet or soiled clothing is sluiced, rinsed, and put in a plastic bag for parents to collect.
- Floors in children's toilets are washed twice daily.
- Spills of body fluids are cleared and mopped using disinfectant.
- Mops are rinsed and wrung after use and stored upright, not stored head down in buckets.
- Mops used to clean toilets or body fluids from other areas are designated for that purpose only and kept separate from mops used for other areas. Colour coding helps keep them separate.
- Used water is discarded down the toilet.
