CETL CCC&TI Course Map

Instructions:

Use this worksheet to help you plan your course.

Map Details/Explanation of Items:

Module or Unit # and Name: *Provide module number and module title or topic. You may find it easiest to use titles from your textbook if you are using one. It can also be helpful to break the course down by weeks. This can be especially useful if you have big topics that will take some time to cover.*

Module Overview: *How will students benefit from learning this topic? What will get students excited and interested in the topic?*

Module Objectives: *Learning objectives should be specific and measurable. Use* [Bloom's action verbs](#)*, such as describe, identify, analyze, and discuss. Do not use words understand and learn. For more information on writing objectives, refer to the* [UF Office of Faculty Development & Teaching Excellence](#)*.*

Learning Materials (Objective(s) They Align With): *List learning materials, which students will need to go over in this module (in sequential order). Examples of readings are chapter numbers from course textbooks and articles. Examples of media are recorded lectures, videos, links to YouTube videos, and so. In parenthesis after each learning material put the number(s) of objective(s) it aligns with. Refer to the following resources when creating lectures/videos:*

Assessments: *List the types of assessment you will use to assess students' knowledge and skills in each module. Examples of assessments are quizzes, assignments, (group) projects, discussions, exams, and so on. In parenthesis after each type of assessment, put the number(s) of objective(s) it aligns with.*
