DARIA GALKINA

Novi Sad, Serbia | P: +381 67 7775 352 | darlenegalkina@gmail.com

SUMMARY

Frontend Developer with 4 years of experience building responsive, maintainable web applications using React, Next.js, JavaScript, TypeScript, HTML5, CSS3, and Tailwind CSS. Skilled in writing clean, scalable code with unit tests (Jest) and developing intuitive, performance-optimized, user-centric interfaces. Experienced in solving complex frontend challenges and collaborating with designers and cross-functional teams to deliver consistent UX. Proven track record in improving UI stability, code quality, and loading speed. Confident in fast-paced environments with an ownership mindset, strong communication, and intercultural collaboration. Currently expanding backend expertise with Node.js, PostgreSQL, Express, GraphQL, and Supabase, while exploring AI integrations, Go, and NestJS. Fluent in English (C1), conversational German (B2).

SKILLS & TECH STACK

Languages: JavaScript, TypeScript, HTML, CSS
Frontend Frameworks & Libraries: React, Next.js, Redux, Redux Toolkit, React Hook Form, React Query (TanStack), Zod, Tailwind CSS, SASS, Less, Material UI (MUI), Ant Design, ShadCN, Bootstrap, Storybook
Tools & Environments: Git, GitLab CI/CD, Node.js, Go, NestJS, Express, Docker, PostgreSQL, GraphQL, Supabase, Vite, Webpack, Gulp, Jest, ESLint, Prettier, Figma, VS Code, Jira, Trello
Concepts: Component-based Architecture, Feature-Sliced Design (FSD), Micro Frontends, Responsive Design, Cross-browser Compatibility, RESTful APIs, Agile (Scrum, Kanban)

EXPERIENCE

Frontend Developer – EdTech   *August 2024 – Present*
EdTech startup providing digital tools for architects and urban planners

- Implemented multi-step forms with React Hook Form, reducing manual data processing time by up to 50%.
- Integrated performant nested TanStack Tables for course access control, cutting load time from 10s to 3s.
- Boosted upload accuracy by 30% with responsive, cross-browser file preview.
- Built API and server logic in Next.js with Supabase backend, enabling admin workflows for managing 1000+ users.
- Assembled and documented a reusable UI Kit in Storybook, reducing UI duplication by 35%.

Frontend Developer – RequestPort   *June 2022 – July 2024*
B2B lead generation platform for client matching and business connections

- Developed admin panels in React and Next.js, driving a 25% increase in partner onboarding efficiency.
- Launched registration forms with React Hook Form, leading to 70% of profiles with all fields filled.
- Raised test coverage from 40% to 60% via Jest (unit, integration, E2E), increasing release stability.
- Reduced unnecessary re-renders by 30% in topic-based filtering using Redux Toolkit.
- Created a reusable UI system with SASS and MUI, powering 10+ B2B landing pages with consistent branding.

Frontend Developer Trainee – Terem   *August 2021 – May 2022*
Company offering digital solutions for home design, financing, and service infrastructure

- Engineered a promo carousel, resulting in 45% more clicks on targeted offers.
- Achieved 95% pixel-perfect accuracy in React UI components translated from Figma.
- Improved cross-browser compatibility and layout responsiveness minimizing layout bugs across 3 device types.

EDUCATION

Elbrus Coding BootCamp   *January 2022*
Full Stack Developer
Moscow City Teachers' Training University (MGPU)   *June 2020*
Bachelor of Linguistics, Cross-cultural Communication — English and German

LANGUAGES

English (C1 – Professional working proficiency), **German** (B2 – Working proficiency), **Russian** (Native proficiency), **Polish** (A1 – Elementary proficiency), **Serbian** (A1 – Elementary proficiency)
