4. Minutes of meeting

1. Live Demos news

created mock component + CB instance + CKAN instance

tenant in Cosmos

using Cygnus for Cosmos

Still to setup SpagoBI instance + reports (because of IDM rest apis changed)

Davide asks: publish a pdf file to the store (after exporting a report in pdf format)? makes sense?

Aitor: ok

Francisco: already published an instance of store and repository (same machine → same public IP)

Definition of raw datasets → in progress

Aitor: suggests to publish SpagoBI datasets in CKAN in csv format → connectors

This is publication of premium datasets in Store and will be private datasets.

Davide: Are you going to develop any Wirecloud widgets, or use the existing?

Alvaro: use existing

Davide thinks we'll be able to finish first release of the demo by the end of Sept. Everybody agrees.
