

Hello,

I am interested in moving forward with you as a care provider for my family. My employer offers a benefit through Helpr that lets me complete screenings for a candidate of my choice, free of charge.

Here's how it works:

1. I will or have sent your name, email address, and phone number to my care consultant at Helpr.
2. My care consultant will send you an email from an @hellohelpr email address with instructions to complete a few simple steps to provide the information they need to initiate the vetting process.
3. Once you have provided the necessary information, Helpr will complete one or all of the following checks:
 - Professional care reference check
 - Helpr will need the names and phone numbers/email addresses of two care-related references.
 - Social media screening
 - The social media review scans for instances of hate language, violent language, illicit/illegal content, etc.
 - CPR certification confirmation
 - If you do not have a current CPR certificate, my consultant will be able to share resources to help you obtain your certification
 - Motor Vehicle Report (MVR)
 - Driving insurance check
 - U.S. Government ID validation
 - U.S. Criminal background check

If you have any questions regarding details of the vetting process, please ask the consultant by replying to the email they send you.

Thank you so much!
