

1000 CINEMATIC LUTS

This Is The Cheapest Cinematic LUT Bundle In 299rs Only.

Color grading LUTs (Lookup Tables) are incredibly useful in the world of filmmaking. Color grading LUTs help maintain consistent color and tone throughout a video or photo shoot, even if different scenes were shot under varying lighting conditions. This ensures a uniform and professional look in the final product.

LUTs allow for quick and efficient color grading by applying predefined color transformations. This saves time and effort, especially when working on large-scale projects or tight deadlines.
