Confidence Interval Game

For each question below, write down a **low guess** and a **high guess** so that you are **90% sure** the real answer falls within your range.

👉 **Example:**
 Question: How tall is the Eiffel Tower (in feet)?

- Low guess: 500 ft

- High guess: 1,200 ft
  (*The true height is 1,083 ft, so this interval captures the right answer.*)

Questions

1. According to Dyson, how many prototypes did James Dyson make of his vacuum?

2. How many episodes of *The Simpsons* are there?

3. How many confirmed kills did the Red Baron have before he was shot down in 1918?
