

## SPEAKER 1

If you use this black cherry trick, tonight you'll already be having sex like a porn star without any difficulty. I know plenty of guys over 80 who use this secret trick to activate the hidden erection button. And they have sex more than five times a day, with rock hard and powerful erections on demand. After this, you can throw your pills in the trash because you'll never need them again. What you're about to discover today will go head to head with the pharmaceutical industry and prove that the real cause of impotence has nothing to do with age, stress, or testosterone.

Plus, you'll get rid of impotence naturally, without leaving your house and without spending money on medication, surgeries, or doctors. No diet changes, no boring exercises, just using this simple black cherry trick, which you can do in your kitchen in just 15 seconds. Simply watch this short video I'm about to show you and discover this new trick that science has revealed. It has already helped more than 86,230 men.

The Arabs have been using this trick for centuries to guarantee rock-hard erections multiple times a day and to satisfy several wives in their harems. For centuries, sultans needed energy to please dozens of women and get at least one pregnant, ensuring a strong lineage. That's how this simple and natural trick came to be. The pharmaceutical industry has hidden this secret for over 100 years. But now we know that this black cherry trick activates the erection button, the one that decides when your penis gets hard and how rigid it becomes.

When it's activated, you get hard instantly. Wherever you want, whenever you want, and for as long as you want. That way, you can have wild sex with your partner, make her orgasm multiple times, and leave her shaking with pleasure. Forget pills or any other method. Just put this black cherry under your tongue to activate the erection button, wait 60 seconds, and watch a furious

anaconda. Thick and hard as steel, spring out of your underwear, desperate to have sex. Just watch this homemade video now.

Every woman secretly craves to be treated this way. If your partner says she doesn't, she's probably lying just to spare your feelings. I hate to break it to you, but her biggest concern is how hard and thick your penis is. And if that bothers you in any way, listen closely. Even if I were to die tomorrow, today, in just a few moments, you're going to learn the black cherry secret. The same trick used by porn stars and celebrities to have sex for hours with dozens of women every day, even at an old age, without ever needing blue pills or expensive surgeries. A former adult film actor revealed a simple black cherry hack that can make any man's tool as hard as a steel rod for hours. This is exactly what porn stars do before filming intense orgy scenes with dozens of women without ever losing their erection. Amazingly, this 15 second black cherry mix saved my marriage and turned me into a sex machine. And the best part? The scientists who studied this secret in-depth won the Nobel Prize because they discovered that this 100 % natural solution is the only one capable of attacking the real cause of erectile dysfunction. Contrary to popular belief, it has nothing to do with genetics, age, or testosterone. In reality, it all comes down to a dangerous toxin in your body. This toxin has been nicknamed the erection killer and it holds the key to restoring powerful, long-lasting erections. The good news? These same scientists discovered that a special type of cherry grown in a small village in Italy can flush out these toxins and naturally boost your erection enzyme by up to 418 plus and giving you a bigger, thicker, and rock-hard tool for hours. Try it to some, try it tonight, and see the results for yourself. But before I reveal all the secrets and show you exactly how to do this trick at home in just seconds, let me introduce myself. My name is Dr. Stefan Marks. I've been an endocrinologist for over 20 years and run an endocrinology institute in Philadelphia.

Many of my patients come to me looking for natural ways to improve their sexual performance in the bedroom. But like most doctors, I used to put 100 % of my trust in pharmaceutical drugs. To me, everything revolved around hormone treatments and prescription pills, and this is my wife, Martina, a 37-year-old Italian beauty. In recent years, I started experiencing frequent failures in the bedroom. That's when I realized that sexual health was far more complex than I had ever imagined, and that I wouldn't be able to fix it with pills alone. Martina and I had been married for over 15 years, and we had always had a very active sex life. I had never struggled to satisfy her bringing her to climax every time we were together. But after years of repeated failures, everything changed. At first she didn't say much. She didn't show any concern or frustration. But as the weeks went by, I started seeing the disappointment in her eyes. I knew she craved the passionate sex we used to have so often. And you may not know this, but Italian women love sex. They are passionate and intense in bed. But I wasn't able to keep up anymore. I'd never been the guy with the biggest size, but I always made up for it with rock hard erections every time she wanted me. But when my erections started disappearing, I found myself completely trapped.

After all, I had a sexy, passionate Italian wife at home, hungry for a man who could satisfy her, and I was no longer that man. If I couldn't turn things around, my marriage would be over. And to be honest, it almost was. In desperation, I tried everything I knew. I took blue pills, which, over time, messed with my vision, made me irritable, and gave me an out-of-control heartbeat. I tried testosterone therapy, which was awful, forcing me to inject myself intramuscularly like a drug addict. To be fair, these things worked at first, but after a while, they stopped working. Even with triple the recommended dose, my penis wouldn't stay hard.

And just like I feared, Martina started pulling away even more. Our relationship turned cold, to the point where we lost all intimacy. We stopped calling each other love. We even started sleeping in

separate beds. I could already see it happening. My wife would find another man, maybe a co-worker, maybe a friend, maybe even a total stranger. Someone who could give her what I no longer could. Someone who made her feel desired. Divorce would just be a matter of time. And when it happened, I wouldn't just lose my wife. I would see my kids less and less, and eventually they wouldn't even miss me. And beyond losing my dignity, I'd feel it in my wallet too.

Because once the papers were signed, all the money I worked so hard to earn would be split in half. Alimony, asset division, legal fees, everything crumbling before my eyes. But luckily, we had already planned a trip to Italy to visit my wife's family in her hometown, a small Mediterranean village called Salento. And I'm grateful for that trip, because it was there that I discovered the miraculous solution for masculinity. The very one I'm about to share with you.

So, in June 2023, we left Philadelphia and caught a flight to Italy. It was only the second time I had met her parents, even though we had been married for over 15 years. But what impressed me the most was that, despite their age, her father at 68 and her mother at 63, they were full of energy and youth. Her father was incredibly strong for his age, and more than that, even after nearly 50 years of marriage, they seemed to have the perfect relationship. They never argued, they showed affection,

and were best friends. I was amazed by all of it. But what shocked me the most was what happened that night. Her parents were deeply religious and every evening they gathered with a few friends to read Bible passages and talk. I'm not as religious as they are, but that night I decided to join them. By the end of the evening, all the guests had left and I was sitting in the living room thinking the night was over. For me it was, but for my in-laws, the night was just getting started. Because I couldn't sleep at all, I kept hearing a constant thumping of the headboard against the wall, along with

loud, relentless moans from my mother-in-law who kept saying all kinds of things in Italian that I couldn't understand.

It was almost comical to think that just a few hours earlier, this elderly couple had been part of a prayer group. The whole situation left me completely embarrassed. How could a man nearly 70 years old do that while I, a man 30 years younger, couldn't even keep my penis hard? I thought to myself. So I got up to grab a glass of water. And while I was in the kitchen, I heard a door open. And there he was, the old man himself. He looked at me and said, busy night, huh? At that moment, my face was burning with embarrassment, but I couldn't help myself. I had to ask. I asked how he could still perform like that at his age while I, a man 30 years younger, was already struggling. Well, I have something that might help you," he said. I think he saw the desperation in my voice and in my eyes, because he decided to help me. He opened a drawer, pulled out a small card, and handed it to me. This is the number of the guy who helped me. Call him tomorrow and try to book an appointment. I'm sure he can help you if he's available. I was skeptical and honestly a little embarrassed about the whole situation, but I knew this was my last chance. If I didn't do something, my marriage wouldn't survive once we got back home. So I decided to give it a shot. The next morning, I called and managed to get through to the receptionist. Her accent was thick and I could barely understand her.

But after a few minutes of talking, I secured an appointment for the next day. And when I arrived, I was shocked by the sheer number of awards and recognitions this doctor had received in his career. His name was Paolo Rossetti, a renowned Italian urologist trained at the University of Milan with a specialization from Oxford University. He wasn't just famous in Italy, he was known all over Europe. He had been interviewed by the BBC and had written multiple books on erectile dysfunction throughout his career. The man was nothing short of a legend. When I sat down with him, I told him everything.

How erectile dysfunction was ruining my life and my marriage. I explained how I had tried everything.

Supplements, exercises, medications, and that nothing had worked. And that's when he explained why none of it had worked. Stefan, the truth is simple. None of these things worked for you because they were never designed to work. The erectile dysfunction industry is a billion dollar business. In my last research study, I found that they make nearly \$300 billion a year selling erection drugs. Do you really think they're incapable of creating a long-term solution? Of course they can, but they don't want to. In fact, they do the exact opposite. Whenever they discover powerful new solutions, they make sure they disappear so no one can access them. So I asked him, But if none of these things can help me, can? I didn't expect the answer to be so eye-opening. Here's what he explained to me.

Fortunately, this is rare. Most of the time these chemicals don't reach the brain. Instead, the body filters them out and sends them to the testicles, where they're flushed out through urine. That's why, when a newborn pees, the urine is often red or orange. That strong color is a sign that these chemicals are being expelled. But here's where things get interesting. Because the explanation he gave me, which I'm about to share with you, will revolutionize the future of global medicine. Last year, a team of researchers at New York University was conducting a study on the male body when they accidentally discovered that even in adulthood...

Many men still carry residues of these chemicals in their bodies. This immediately caught the scientists' attention, so they began investigating further. After four months of research, what they discovered changed everything we thought we knew about erectile dysfunction and male health. You see, they found that even when we're young, some of these chemical residues from medications

and vaccines end up mixing with a group of cells and artefacts called interstitial cells.

Now, I don't know if you're aware of this, but many doctors call these cells the testosterone factories. That's because interstitial cells are responsible for producing all of the testosterone in our bodies, from puberty until the end of our lives. And this is where the problem begins. Once this testosterone factory gets contaminated with chemical residues, the body can no longer produce pure, natural testosterone. Instead, it produces a different type of testosterone called DHT, or as scientists call it, toxic testosterone. The study also uncovered two shocking facts about this toxic testosterone.

The first, about 62 % of men by the time they reach 40 are producing toxic testosterone instead of normal testosterone. The second, men who produce toxic testosterone suffer from at least two of the following conditions in adulthood. Erectile dysfunction, premature ejaculation, severe prostate problems, small penis size, hair loss, difficulty building muscle, chronic fatigue and low energy. So if you suffer from at least two of these seven problems, this is the strongest evidence that your body is producing toxic testosterone instead of healthy testosterone. When Dr. Polo explained this to me, it was like a light switch flipped in my head. I finally understood why I couldn't get erections. But I still had one big question. Doctor, what do I need to do to get rid of this toxic testosterone from my body? He smiled and said, oh, you don't need to get rid of it. After all, it's still testosterone. The only problem is that it's contaminated. Think about it. Would you cut off your arm just because you had a fungal infection? Of course not. You'd simply treat it until it was gone. And that's the exact same logic here.

All you need to do is flush out the toxic residues from your interstitial cells so your body can start producing pure, clean testosterone again. Then he showed me the two paths I could take to remove these toxic residues. The first option is a long, dangerous road, one where you could choose to undergo genetically modified testosterone replacement therapy. But this method comes with potentially fatal side effects, and after nearly 30 years in medicine, he strongly advises against these injections because they don't treat the root cause of bad testosterone.

That's why some men experience short-term improvement, only for their penis to go back to the way it was. Because the real problem was never addressed. So ask yourself, is it really worth enduring the pain of intramuscular injections, the risk of liver and heart damage, abscesses, embolisms, and even mental health deterioration? Imagine becoming bitter, stressed, and aggressive, pushing everyone away just because of these injections. I didn't think it was worth it. So if you want to naturally stimulate penis growth and restore your ability to stay rock hard, you need a smarter approach. One that can identify and eliminate all of these toxic substances from your system allowing your body to start producing pure testosterone once again. When the doctor explained this to me, I was shocked, but it made complete sense. He then walked me through his natural treatment, which involved introducing specific nutrients into my bloodstream that would flush out stored chemicals from my testicles and boost my clean testosterone production by up to 20 times. We plan to start this protocol the next morning. The goal was to ensure that my body kept generating the clean hormonal levels needed. Until my penis reached its full potential, this approach involved three specific natural compounds that would detoxify my bloodstream from these toxins.

The first ingredient we used was anthocyanin, a powerful natural vein cleanser. It's found in black cherries and other berries, but in very low concentrations. After laboratory testing, we discovered that

to get the full benefits, you'd need to eat pounds of this fruit every single day, which is completely unrealistic. So we worked with a laboratory to extract pure anthocyanins from black cherries, ensuring maximum potency and effectiveness. Anthocyanins act as a deep cleaning agent, relaxing the blood vessels and increasing blood flow. After all, to achieve rock hard, long lasting erections for at least 40 minutes, you need to eliminate toxic blockages from your system. The second ingredient Dr. Paolo used was citrulline, another powerful compound found in watermelons and melons. Citrulline works by relaxing and expanding the blood vessels in the penis, significantly boosting nitric oxide production. This increase in blood flow leads to bigger, thicker, and harder erections. But the final ingredient, the one that gave Dr. Paolo's formula its golden touch, was hydrolyzed collagen. It was added with one goal in mind, to increase both the length and girth of the penis. The science behind hydrolyzed collagen is based on its ability to promote regeneration and strengthen tissues when consumed. This compound doesn't just benefit the skin, improving elasticity and hydration, but can also positively impact other tissues, including penile tissue. The concept is simple yet revolutionary. By regularly consuming hydrolyzed collagen, its restorative effects spread throughout the body, delivering improvements where they're needed most, including your penis. This presents a powerful and effective approach to penis enlargement, one that eliminates the need for risky surgeries or direct injections that come with painful recovery periods. The promise is clear.

By adopting this triple action formula combining the power of anthocyanins, citrulline, and hydrolyzed collagen, men of all ages can experience life-changing benefits beyond just penis growth and stronger erections. By effectively addressing erectile dysfunction, this formula enhances overall sexual health, leading to greater confidence and well-being, all without expensive or invasive treatments. And finally, I had this formula in my hands. The key to

everything was extracting the pure concentrated compound from black cherries, which is why Dr. Paolo calls it the black cherry hack.

This potent extract acts like an abrasive agent, flushing out toxins from the body, especially from the testicles and penile chambers responsible for size and hardness. Women love a formula that works as a lethal weapon against testosterone toxins, while promoting a size increase of 1.57 to 3.54 inches and skyrocketing libido. And I am living proof that this works. In the first few days, I started noticing some changes. My libido increased slightly, I had morning erections, and my daily energy levels were higher. One week later, I barely recognized myself. My wife even compared me to a porn star.

I had never seen my penis like this before. I was a completely different man in bed. And it wasn't just her who was impressed, I was too. I never imagined I could have a tool this thick and rock hard, able to stay solid for hours. Today I have a new life. I feel like the stallion I always wanted to be in the bedroom. And now I can stand naked in front of my wife without an ounce of shame, even when I'm soft. Because even when flaccid, it's much bigger. But I have to admit, now it's almost impossible for her to find me in that state. Because the moment I get close to her, I'm rock hard like a steel rod.

Dr. Paolo's formula was so incredible that I knew I had to bring it back to Philadelphia. I couldn't wait to introduce it to my patients, men struggling with poor performance in bed. I wanted every man to finally break free from those useless, dangerous pills and experience the same life I was living and still live today. A life free from the fear of failure in those intimate moments. A life free from insecurity about size. And best of all, a life where you're truly the man your partner craves in bed, capable of giving her the most intense orgasms she deserves. But of course, before I could bring this formula to more men,

I needed to prove that it worked for everyone. So with Dr. Paolio's approval and assistance, we decided to conduct an in-depth study to test the power of this formula. We selected a group of 220 men, including men of all ages ranging from 30 to 80 years old, men who had been struggling with erectile dysfunction for years, men who had just started experiencing symptoms. Some had tried everything, others had never tried anything to fix the issue. And after 12 weeks of closely monitoring these men, the results were beyond incredible. 93 % of them experienced a 27 times increase in testosterone production from their original level, 89 % of men reported an increase of up to 1.24 inches in length and 0.62 inches in girth. 77 % of them reduced body fat percentage and even gained lean muscle without doing any exercise. And the most impressive result, 100 % of the 220 men regained spontaneous, long-lasting erections, averaging 50 minutes of rock-solid performance. In short, it was a complete success. And after that, I knew exactly what I needed to do. I had to share this solution with as many men as possible. So I reached out to Dr. Paolo and together,

We partnered with one of the safest and most reputable laboratories in the United States. To produce this formula at a larger scale while maintaining the highest level of purity and quality, it had to be practical and easy to take. Men shouldn't have to measure out each compound every time they wanted to take it. So we decided to create this formula in the form of advanced gummies, perfectly concentrated and effortless to consume. After subjecting the formula to rigorous quality testing and FDA approval, we were finally able to make it available to the public. And today I'm proud and excited to introduce you to Eros Bytes.

In fact, while I'm recording this presentation, we only have 180 bottles left in stock.

So if you're looking to achieve rock-solid, long-lasting erections while also increasing your penis size and girth, if you want the power to give your partner multiple orgasms every time, leaving her completely addicted and obsessed with you, then you're in the right place. Because eros bites is the only formula in the world that can do this for you. And the only place you can get your bottle of eros bites is right here, right now, on this website. It's not sold in

pharmacies because big pharmaceutical companies want to mark up the price by 10 times. And we believe that's wrong.

You also won't find Eros Bites on Amazon or eBay because of the high number of counterfeit products. That means this is your one chance to secure your supply of Eros Bites, right here, right now. And before I show you how you can get up to three free bottles of Eros Bites today, I want you to be honest with me. How much is it worth to you to have powerful erections anytime you want, just like you did in your youth? How much is it worth to you to have sex for 40, 50, or even 60 minutes nonstop?

To have a bigger, thicker penis, to have more energy, higher testosterone levels, and to experience the genuine admiration and devotion of a woman who becomes addicted to your manhood? Most men spend an average of \$1,000 per year on blue pills, and all those drugs do is keep you hard for a few hours, while making you dependent and slowly damaging your heart. There are also men who pay up to \$10,000 for bizarre surgeries, which can even lead to total amputation of their most prized possession. And then...

But there are guys who waste hours doing weird penis massages and stretching exercises, methods that have zero scientific proof and often cause serious painful injuries. The problem with all of these options? Besides the known risks, none of them solve the problem permanently. That's why after seeing the results with their own eyes, many Eros Bytes users told me they would gladly pay \$1,000 for just one bottle. And while we know this formula is worth every penny, I also know that price would put Eros Bytes out of reach for many men who truly need it. So I would never charge \$1,000 for Eros Bytes.

My goal here is to help men like me, who have faced these struggles firsthand, to save relationships from falling apart, to prevent the pain of betrayal. That's why Dr. Paolo agreed to charge

only enough to cover operational costs, including the laboratory expenses, research team, high quality ingredients, gummy production, and even the cost of keeping this video online. That's why the original market price for Eros Bites is \$150. But because you've taken the time to watch this video until the end, I've prepared a special offer where you can claim up to three bottles of Eros Bites completely free.

Here's how it works. When you order the 6-bottle kit, you pay for only three and get the other three completely free, securing six months of treatment, which is the best option. That means each bottle of Eros Bites costs just \$49, the lowest price ever offered. This is the best choice because not only do you save money, but you also ensure that your body continues pumping 20 times more blood into your member, gradually increasing your penis size, prolonging your erections, and unlocking all the additional health and virility benefits. Now, if you prefer the 3-bottle kit, you pay for only two and get one completely free.

how to last, over 60 minutes in bed. Inside this guide, I share 12 simple tricks and exercises you can do at home in under five minutes to gain complete control over your ejaculation and last as long as you want. With this, you decide when sex ends. You control the experience. You'll never finish in the first five minutes again, and you'll be able to leave your wife fully satisfied after hours of wild, passionate sex. And trust me, she's going to love your new ability to last long because the longer you last in bed, the more intense her pleasure becomes. Bonus number two, the digital e-book. The five positions that make her moan and scream. These positions were created by ancient Egyptians and they're designed to make any woman addicted to sex with you. So not only will you have a bigger, harder and thicker erection ready for action anytime you want, but you'll also know exactly how to penetrate her in a way that makes her moan and scream with pleasure. These ancient positions were designed thousands of years ago to maximize female pleasure.

Because of the way they allow your penis to enter her, they stimulate highly sensitive pleasure points, triggering sensations

she's never felt before. Bonus number three, the manual, how to give a woman multiple orgasms. This manual is my personal favorite because it teaches a lesbian trick using just two fingers, a technique I learned from one of the world's leading sexologists. It can make any woman experience multiple orgasms in just a few minutes. It's seven times more powerful than tongue action, hand techniques, and vibrators combined.

When you use this trick on a woman, she'll feel uncontrollable pleasure. Beyond anything she's ever experienced before, she'll become obsessed with you and crave sex with you constantly, because all she'll be able to think about is the explosive pleasure you gave her. With this lesbian technique, you'll become a master of the female body, knowing exactly where all her pleasure buttons are. You'll know how to make a woman orgasm two, three, even four times in a row, leaving her legs weak and trembling. And it doesn't matter if she's never had an orgasm in her life. When you use this trick, she'll squirt like a broken pipe, completely drenching your bed. And because of this, she'll never think about another man, or even consider divorce. You'll be the only man who can give her this kind of pleasure. The kind of unbearable toe-curling pleasure that makes her climax five times in a row. If we add up the value of all these bonuses, it would cost around \$500 to access everything. But today, when you secure your three or six bottle package, you'll get all three bonuses absolutely free. So don't waste any more time.

Click the button below now and secure your six month package or any other package of your choice. And let me tell you one more thing. I am so confident in our formula and I know it will completely transform your life that if by some miracle, Eros Bites doesn't give you steel heart erections and a much thicker penis than you've ever had before, I won't just refund every single penny of your investment. I'll even let you keep the bottles for free. Does that sound fair? Now, there are no more excuses. This is the best offer

I've ever made, but you must act today before the stock runs out completely.

And listen, I understand if you're skeptical. That's why we've taken all the risk off your shoulders by offering an exclusive 180-day guarantee. Just choose any of the three Eros Bites packages below, use it for at least one month, and if you don't notice, your erection's getting harder whenever you want, your ejaculation becoming more controlled, and your penis getting thicker. Simply send us an email at [contactatryersbites.com](mailto:contactatryersbites.com) or call the number on the back of the label and we'll refund your money immediately. In other words, if it doesn't work, you simply get your money back. The only real risk is saying no to this investment and continuing to fail in bed.

putting your marriage at the edge of collapse and possibly never experiencing truly satisfying sex again. At this point, have two choices. The first choice is to close this video and continue on with your life. To ignore everything I've explained so far, and turn your back on all the scientific evidence proving that Airos bites is the only thing that can help you achieve a bigger, rock-hard penis. By making that choice, nothing in your life will change. Your penis will continue to be inadequate for your wife, and as the years go by, maintaining an erection will become even more

difficult. The frustration, embarrassment, and shame in bed will become your new reality, making it nearly impossible to achieve a strong enough erection to satisfy your wife, even with blue pills.

And on top of that, you run the risk of penile shrinkage. Yes, that's right. As your muscles weaken and your blood vessels constrict, your penis can shrink by up to 3 inches, 7 centimeters. That's devastating, and no man deserves to go through that. Plus, as you've seen, female sexual dissatisfaction is one of the top reasons behind skyrocketing divorce and infidelity rates. I imagine that's not something you want to experience, right? That's why I urge you to choose the second option. Secure your supply of Eros bites right now, while you still can. Try this unique revolutionary formula for a full 180 days, 100 % risk-free and see for yourself how your sex life will transform, just like it has for thousands of other men. Because if you don't act now, our supply will sell out and you won't have another chance to get it for at least three months. That is, unless Big Pharma takes this video down to protect their failing pills. And you know what that means, right? It means three more months of putting your life at risk by taking blue pills, keeping your heart in a constant state of stress and danger. That is, if those pills still work for you.

Because if they don't, it means three more months of no sex. After all, no man wants to go through the humiliation of failing in front of his partner again. A man is a symbol of strength and power. And if a man can't maintain a strong, lasting erection to satisfy his woman, she will lose respect for him and start seeing him as weak. And I know that's not the image you want to project to your partner, right? The image you want to project is one of strength, leadership, dominance of a man who takes charge. And you know what men who take charge do? They don't sit around feeling insecure or afraid when faced with a problem. They take action and make decisions. So make the smart decision.

Say yes to the possibility of having a bigger, stronger, more powerful penis. One that never fails you again.
