SOC 204 Week 3 Group Project Log

Sociological Research

Project log entries are due on Sunday by the end of the day. You work on these questions together as a group. If you want to color code your participation you can. Some of the questions are addressed to each **group member** individually, others are addressed to you as a whole **group**.

I will grade these as complete (full credit), mostly complete (partial credit) and incomplete (zero) and I will provide replies and feedback in the comments to the grade as needed. Feel free to reply to my comments right where you see them or email me for further dialogue.

Done Individually

1. What is the most interesting thing you've learned in this week's chapter on sociological research?
2. Do you have an unanswered question from the chapter or something that was not clear?

Group

Copy and paste my comment(s) from the previous week(s) if you have them and address them.

Create a brief research design about a topic you picked out last week. Now write a letter to a philanthropic or grant organization requesting funding for your study. How can you describe the project in a convincing yet realistic and objective way? Explain how the results of your study will be a relevant contribution to the body of sociological work already in existence. List the methods you will implement. Keep in mind that the funding is competitive, so the board members will be looking for the best bang for their buck.

You will need to be a member of a group to complete this assignment. Only one member of a group needs to submit it but both of you will need to work on it.
How do I view my Canvas groups as a student?

If you do not see your group after following these instructions check your Inbox. I sent you information on what I need you to do.
