

Favorite Classroom Productivity Apps

<u>DocScan</u> 	Scans all documents, even pages with curls. Add drawing and enter text notes. Creates pdf's from scanned document and can be placed within a folder. Easily share scan through Facebook, Google Drive, Dropbox, Evernote, and many more. Free and paid versions.
<u>Confer</u> 	Note-taking app for teachers. Take notes about students in math, reading, and writing in a small group or individual setting. Quickly create flexible small groups by sorting students based on notes taken. All data can be uploaded to your Google Drive account as a spreadsheet. Free and paid versions.
<u>WorkCam</u> 	This app helps keep your personal and professional photos separate. While at work or school, take pictures through this app and the pictures will automatically back up to your Google Drive or Dropbox account - instead of your camera roll. Photos can also be organized automatically into folders. If you forget to use WorkCam, photos can be imported from your camera roll.
<u>Easy Behavior Tracker for Teachers</u> 	Record positive and negative student behavior, view reports of student behavior, contact parent's immediately through email, sms, or phone call directly from the app. Several classes can be added within the app for teachers with multiple class periods. Class history can be exported to save or print reports.
<u>Teacher's Professional Development Log</u> 	Enter professional development, who it was conducted by, and how many hours you have logged. This app will keep a running total of your hours logged and will display how many more hours you need.
<u>Remind (Previously Remind 101)</u> 	Communicate with students and parents through texting messages, photos, or documents. All phone numbers are private and messages are one-way - replies are not possible. If you have used Remind101 in the past, you will want to check out all of the incredible updates to the new Remind.
<u>StickPick</u> 	Randomly choose a student and use question starters during classroom discussions. A question stem mode can be utilized in which questions are based on Bloom's, Bloom's Revised, ESL, or no stem. Classroom discussions can easily be differentiated by linking question stems and difficulty based on student needs. Track and assess student answers by rating student answer. Multiple classes can be created in this app. Small groups can also be made with question stems assigned, allowing students to work independently asking and rating each other's questions.
