### **Tips for Cooking and selling cooking stuff**

Try Selling your food in bulk 200-400 at a time ex. WTS 200- fish and nuts for 2.5mil or 13k each. This keeps your inventory free and your sales quicker or just leave I bazaar or company shops. Time Saved is money earned remember that so if you sell in bulk dont be afraid to cut price a bit

Store this stuff in banks, company shops quarters and in your captain bag because it can hold 999 of the item and you can hold 400 on you so at any time you can carry 3400 of a vigor food

Don't be afraid to use mysterious spice. Also set keyboard shortcuts when using mysterious spice that way you get the most uses out of it before it runs out

The following Skills will help make money with cooking

Recommended: Food Trading, Seasoning Trading, Alcohol Trading, Collection, Fishing

Optional: Spice trading, Livestock trading, Medicine trading, Handicraft

Check company shops for ingredients to save time like Tunas, or Berries for example

Cooking can be time intensive but.... Not if you have help if you can get a few friends or company members who can cook to help u out you can make a lot more money and save more. Example one person is making flour from Wheat while another is making seafood pizza with the wheat that saves lots of time.

### Selling Food to clerks and shopkeepers

In addition to selling to players you can sell your goods to clerks in taverns of major cities IF you sell to a clerk that sells that food you will get a better price which is GOOD money for newbies for relatively no work.

Heres an example of me selling scones to Seville

Certain Foods sell well to shopkeepers you can make cash that way too

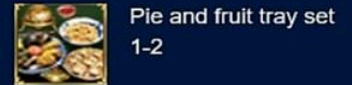

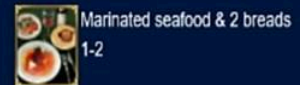

Here is the list of all foods the towns sell and the aide food that can be made there

MILESTONE. At this rank you can now make the MOST expensive food in the game Salted Piracuru company contribution item...OMG I HATE when my company has to contribute this item as the Arapaima fish you need to catch are such a pain it takes a ton of time and effort to get them plus rats can eat them UGHH. Needless to say people rather buy these than go fish them.

**Grilled salted piracuru:** Judging by my whining about making this you can see why the food is worth so much its used as a company contribution item and most people hate fishing it. Worth...150k-300k EACH and 100k for a quick sale no less
