

Shelly Lefkoe - Parenting The Lefkoe Way

Shelly is passionate about two things. First is helping people create joyful and free lives by helping them eliminate the beliefs that keep them stuck. Second is transforming the way in which people parent on this planet. She believes that if we raise a conscious generation of children, violence will end, people will treat each other with respect and dignity, and life on the planet will be better in all respects—no matter who is running the government. She is excited to bring you this 7 Module series which outlines the process behind belief shaping!
