Create an advertisement for an outreach concert for your community with three selections of music from the course or from your favorite music. Remember, you don't have to actually produce the concert! You will come up with an advertisement for one instead. Your ad will answer the following questions.

- What are your three music selections?
- Why did you choose each one?
- Who is the concert for? It could be a nursing home, cancer benefit, school, or any of the other examples you've learned about.
- How will this concert help people?
