

# Dimensional Dungeons

## Pokémon Spawn Guide

### Overview

The Dimensional Dungeons are mysterious trial areas filled with ancient constructs, digital entities, and ghostly guardians. This biome features Pokémon that feel at home in labyrinthine structures — from cryptic Unown inscriptions to mechanical Klink gears to spectral Duskull lurking in shadows.

Biome ID: **dimdungeons:biome\_dungeon**

### Spawn Conditions

Since the Dimensional Dungeons are fully indoors, Pokémon can spawn regardless of light level. No Pokémon will spawn on designated floor blocks (various concrete types, nether bricks, and crimson planks) to prevent spawns in restricted dungeon areas.

### Rarity Buckets

**Common** — Frequently encountered throughout the dungeon

**Uncommon** — Moderately rare, often evolved forms

**Rare** — Difficult to find, powerful Pokémon

**Ultra-Rare** — Legendary or exceptionally rare encounters

## Tips for Trainers

The Regi trio (Registeel, Regirock, Regice) are extremely rare legendary encounters. Be patient and explore thoroughly if you're hunting for these ancient titans.

Ghost-types like Duskull, Shuppet, and Spiritomb lurk throughout the dungeon corridors. Keep your guard up — they can appear anywhere!

The Porygon line represents digital security systems within the dungeon. Porygon-Z is particularly rare — a glitched, unstable version of the original program.

Unown appear in many forms and are tied to ancient dungeon inscriptions. Collect different forms to uncover the dungeon's mysteries!
