

George Jr. High
Promise Standards
Engineering Technology 2 - 9th

- Students will understand the connections between engineering and technology. (Students will learn different aspects of engineering and technology along with researching careers in those fields)
- Students will understand aspects of information and communications technology focusing on CAD. (Students will use computer-aided design software to create different objects)
- Students will understand and demonstrate the use of construction technologies. (Students will develop plans and then use the design process to create objects)
