- The sun powered "Next Exxon". With nearly 220,000 customers. Best of all, this company is less than 1/60th the size of "big energy" companies like Exxon... so there is PLENTY of room for early money to make a fortune!.
- A suburban sun "gusher". This company has a hold in the lucrative commercial side of the business.
- A company with the inside track on the blossoming "remote" power industry, holding a contract with one of the world's foremost jobsite power providers.
- The pioneer company that could soon deliver a big surprise. With revenues in the Top-3, this company is a big player, but with a pending "spin-off" looming.
- The company that has the backing of legendary investor David Einhorn. We can follow this legendary investor to the bank, with expected dividends on the way!.
