Choptank Health Principal's Message – Denton Elementary School

Dear Denton Elementary School Families,

Choptank Health joins us in welcoming your family to the 2025-2026 school year, with a reminder to set your students up for a healthy, successful year by ensuring they are enrolled in our School-Based Health Center.

School-Based Health Centers function like a typical doctor's office, with medical providers assessing and diagnosing illness, writing prescriptions, performing lab tests—including for strep, influenza, and Covid—and physicals including routine well visits and sports physicals. Dental services include screenings, cleanings, sealants, fluoride treatment, and emergency visits.

Appointments can be made by calling your student's health center at 667-248-8030.

It's never too late to help your child enjoy a healthy school year by enrolling them in School-Based Health.

Use these links to enroll your student in School-Based Health, with more information also at www.choptankhealth.org/schoolbased.
