

How to get the frame rate

井民全, Jing, mqjing@gmail.com

ETA: 5 min

Back to the [Main Page](#)

Usage

framerate = wave.framerate

Code

```
import thinkdsp

filename = '0.wav'
wave=thinkdsp.read_wave(filename)

duration = wave.duration
framerate = wave.framerate

print(framerate)

print('filename = ' + filename)
print('duration (sec) = ' + str(duration))
```

Result

8000

filename = 0.wav

duration (sec) = 10.0
