

Top 5

1. Quenda/Kwenda (6 people voted, 15 points)
2. ~~inVade~~ (5 people voted, 16 points) — disqualified
3. ~~ØTrans~~ (4 people voted, 14 points) — disqualified
4. ~~SuMoData~~ (4 people voted, 6 points) — not great
5. Appia (3 people voted, 6 points)

- **Quenda:**

- “to turn” in Galician (and also an adorable animal)
- quenda.be available
- no search results for other companies

- **Kwenda:**

- “to go” in Swahili
- kwenda.be available
- also a South-African marketing company, a DJ and some other search results

Final result

Of those two, **Quenda** is the best option (no confusion with other companies, makes more sense in English, qSoc, ...). So yay!

yeri:

appia+vzw/asbl/npo en alderestappia.xyz = 10 euro per domein per jaar en der zal er maar één gebruikt worden. en dan is het direct 8+ characters. "surf naar appiavzw.net om onze laatste route planner te gebruiken!" .. komaan..

InVade is agressief, "hallo ambtenaren en conservatievelingen van de nmbs, wij komen uw data

invaden. haha. nee serieus.”

Name suggestions for iRail

What's in a name?

- Support digital creativity with a touch of mobility
- Sustain and aggregate open data concerning mobility (like public transport) to offer an easy- to-use webservice for all third-party applications
- Living lab: start all sorts of new projects and support them to become a spin-off
- Copyright management for open-source projects

Yeri says:

- Domain needs a .be, .eu, .org **or** .com address available (beep.com is taken) > but preferably something more global (.be is too narrow)
- needs to be short and catchy
- has to be spellable and clear in its name/pronunciation
- “hi, i am from shmeep npo” ... rly ?!
