Themes & Concepts
Core Concepts ● The Fake Family (Operation Strix): Master spy Twilight (posing as Loid Forger) must construct an instant family to get close to a reclusive politician. ● Hidden Identities: Loid is a spy, his chosen wife Yor is a lethal assassin, and their adopted daughter Anya is a telepath. None of them initially know the truth about the others, except for Anya who reads their minds. ● Cold War Espionage: The backdrop is a tense geopolitical divide between rival nations Westalis and Ostania, where the threat of war drives the high stakes of Loid's mission. Major Themes ● Found Family vs. Blood Relation: The core irony is that a completely fabricated family unit built on ulterior motives slowly develops genuine care, protection, and emotional attachment. ● Secrets and Deception: Everyone wears a mask to survive or protect their hidden selves, yet domestic comedy arises from how their secret professional instincts bleed into everyday parenting and marriage. ● Normalcy Amid Chaos: Beneath the high-octane violence and political manipulation, the fundamental drive for characters like Loid is creating a peaceful world where children do not

have to cry.
