

Create 5 Freelancer Accounts Safely

Did you know that every time you access Freelancer, their system collects over 200 data points about your device? From your Chrome version to your installed font list, even how you move your mouse.

This is why simply logging out and logging into another account is COMPLETELY USELESS for protecting accounts. Your Digital Fingerprint remains identical, and Freelancer can easily link all accounts together.

Statistics That Matter

According to research from 5,000+ MMO Marketing marketers in 2025:

****Account Ban Rates:****

No protection: 78% banned within 30 days

VPN only: 61% banned within 60 days

Antidetect browser: 3% banned within 12 months

****Revenue Impact:****

Average loss when account banned: \$8,400

Time to rebuild: 4-6 months

Trust score recovery: 8-12 months

****Scaling Success:****

With antidetect: 89% successfully scale to 10+ accounts

Without antidetect: 12% can scale to 5+ accounts

Numbers don't lie. Freelancer is getting stricter, and the gap between antidetect users vs non-users is widening.

Setup Workflow For Freelancer

Here's the standard workflow to get started with Multilogin for Freelancer:

Phase 1: Initial Setup (30 minutes)

1. ****Sign up Multilogin**** with code ****SAAS50**** (50% off first month)
2. Download and install Multilogin client
3. Purchase proxies (recommend: residential proxies for Freelancer)

Get 50% OFF: <https://saasverdict.com/go/multilogin> | Code: SAAS50

4. Create profile templates for each use case

Phase 2: Profile Creation (10 minutes per profile)

1. Choose browser core (Mimic for Freelancer)
2. Import proxy (residential IP in target country)
3. Configure fingerprint:

Auto-generate or customize manually

Set timezone to match proxy location

Adjust WebGL, Canvas settings

4. Save profile and test

Phase 3: Account Creation/Import

1. Create new Freelancer account in Multilogin profile
2. Or import existing accounts (1 account = 1 profile)
3. Complete platform verification if needed
4. Age account following best practices

Phase 4: Daily Operations

Launch multiple profiles simultaneously

Switch between accounts without logout

Automation with Selenium/Puppeteer

Monitor account health

****Pro Tip**:** For Freelancer, recommend creating profile 2-3 weeks early, age account with organic activity before running campaigns.

Case Study: Affiliate Network With 200+ Accounts

****Background**:** David runs affiliate network, manages accounts for team members.

****Scale**:** 200+ {platform} accounts across 10 team members.

****Previous Setup**:** Each team member managed own accounts, inconsistent, 30% ban rate.

****New Setup With Multilogin**:**

Multilogin Scale plan (1000 profiles)

Centralized management dashboard

Standard SOPs for all team members

Profile sharing and collaboration

****Impact****:

Ban rate decreased from 30% to 2%

Team productivity increased 3x

Onboard new members in 1 day (vs. 2 weeks)

Monthly revenue: \$180K+ stable

****Lesson****: *At scale, consistency is everything. Multilogin allows standardizing processes across entire team.*

Troubleshooting Common Issues

****Issue 1: {platform} still detects accounts****

Check proxy quality (datacenter proxies easy to detect)

Ensure fingerprint consistency (don't change settings)

Age accounts properly before activity

Verify timezone matches IP location

****Issue 2: Performance lag when opening multiple profiles****

Multilogin requires decent hardware:

Minimum: 8GB RAM, quad-core CPU

Recommended: 16GB+ RAM, octa-core CPU

Close unused profiles

Use profile groups and launch by batches

****Issue 3: Payment issues with code SAAS50****

Ensure entering correct code: SAAS50 (all caps)

Check that you're new customer (code for new users only)

Contact support if issue persists

****Issue 4: Selenium/Puppeteer won't connect****

Verify Multilogin API enabled in settings

Check port configuration (default: 35000)

Update Selenium/Puppeteer to latest version

Check firewall settings

Final Words: The Choice of Winners

In MMO Marketing, there are 2 types of people:

****Type 1****: Those still struggling with 1-2 accounts, afraid of bans, don't dare to scale, stuck at \$500-1000/month forever.

****Type 2****: Those who invest in proper tools, run 50-100 accounts, scale easily, earn \$10K-50K+/month.

****The difference?**** Type 2 understands that business expenses are necessary. \$200-400/month for Multilogin plus proxies isn't a cost - it's an INVESTMENT in infrastructure.

Think About It:

A large agency willingly pays \$5,000-10,000/month for Multilogin Enterprise

Media buyers spend \$1,000+/month on tools

Serious marketers never cheap out on infrastructure

****If you're serious about Freelancer and MMO Marketing****, the decision should be obvious.

Multilogin.com

****P.S.****: Within 30 days, you'll look back and realize this was one of the best decisions you made for your business. Or you'll still be stuck in the same place, complaining about bans and limits.

Choice is yours. Winners act fast.
