

make an svg logo for my website, like the logo in this <https://code.sololearn.com/WSyoS9SZFe79>.

Can someone take the challenge of making something like that, only like a hexagon shape that has a V in the middle (capital v) and under it says "fun games for children of all ages", then post the code here so I can add it to my website easily. i would also like the animation to be infinitely looping and contain these 2 colors:

- 25793B

- 101619

And colors that match the theme of [my website](#)

i am both trying to learn from your codes and am going to feature the best one on my website and give the creator credit, i will also be releasing my website to the public once i have the logo. i will be including a link to the creators profile and of course you can make the logo however you want as long as it meets the criteria, and looks cool.

I know this sounds like a lot but i would really appreciate it if you did make one. I will also never change the logo so you will always have it on my site. I will also be featuring any html5 games you may make if you would like me to.
