Dataverse Community Call 1 Notes

- 4.20 Release
  - Expected this week (Danny)
- GDCC Updates
  - RDA meeting was cancelled - Virtual Plenary talks may be of interest (ongoing through April 10) : https://www.rd-alliance.org/rda-virtual-plenary-programme. Our RDA project poster is also online.
- Community Questions
  - (Jamie) It will be helpful to see the release notes, then I'll have comments
    - (Danny) I'll link them

- - - https://github.com/IQSS/dataverse/blob/6727-420-release-notes/doc/release-notes/4.20-release-notes
  - ○ (Steve) Was there some discussion from QDR about restricted access workflows?
    - ■ (Danny) We're not seeing anything, but Jim and Gustavo are happy to discuss when they connect about restricted access workflows
  - ○ (Schusie) Is there search and indexing support for CJK languages?
    - ■ (Danny) The interface of Dataverse is internationalized to some extent, the languages supported are here: https://github.com/GlobalDataverseCommunityConsortium/dataverse-language-packs
    - ■ (Danny) I'd encourage you to create an issue for the searching/indexing, we can go into more detail there
    - ■ (Jim) indexing is managed by solr - a quick web search after the call for 'solr CJK indexing' shows that there are options that are better than default parsing. Configuring solr using those options could improve searching in Dataverse.
  - ○ (Vincent) Is there any plan to support CJK?
    - ■ (Danny) We'd welcome pull requests to the language packs mentioned above!
