local kios? (yes or no)

□ (yes and no) if the final destination of items is not your city but somewhere else in the region, can you help to find a relay courier(s) to the final destination?

- The above survey can be sent to everyone currently associated with lumbung kios. The questions for couriers can be sent to anyone in [lumbung.space](#) and [lumbung network](#).
- Based upon survey results, all data is mapped, with different lines connecting Kassel to different cities based upon **DESIRED ROUTES (based on reseller interest)**, **AVAILABLE ROUTES (based on reseller and courier availability)** or **PICKED-UP ROUTES (on progress)**.
- Whenever a product maker connects to a seller, they negotiate individually their terms privately via [lumbung.space](#) chat. It is private responsibility to handle the exchange and contribute % to collective pot (though the 'deals' are visualised on the map so everyone can see, it's your responsibility to take care of it). The mechanism to store the collective pot percentage will be discussed among the lumbung kios wg. One possibility is to keep the percentage in each product makers' account and have a document to record this.
- This is a work in progress by lumbung kios working group. If you want to ask

question and give feedback, please
contact (e-mail) and join our room,
kiosnanonano, in lumbung.space.
