

Welcome to the equestrian club (Todos)

We are 1st Grade C from Colegio Andino. (Vicente N)

and today we are going to talk about horses. (Salvador)

First, what is an equestrian club? (Cristobal)

An equestrian club is a place where people go to learn about horses,
(Eugenia)

and how to ride them. (Cristobal)

In this club, students can take riding lessons, (Martina)

learn how to take care of horses, (Mathias)

and spend time with other people who like horses. (Salvador)

Horses are big animals; they are covered by hair. (Florencia)

Horses are herbivorous, they eat plants, (Maite)

They are also viviparous; they develop inside their mother's womb.
(Celine)

Horses can walk, run and sometimes jump in shows. (Vicente M)

Remember that we must take care of them, and their habitat. (Amaya)

We invite you to visit the club! (Agustín)

Bye bye! (Todos)

We are the 1st Grade B from Colegio Andino.

**today we are going to talk about the seagulls that
are in this wetland.**

First, What is a wetland?

A wetland is a piece of land covered by water.

In this wetland you can find different types of birds.

Like seagulls.

Seagulls are small birds.

They can walk and they can fly.

Seagulls are omnivores.

They eat plants

like this one.

And they eat fish

like this one.

Seagulls are oviparous.

**They develop inside an egg.
Like this.**

And their body is covered with feathers.

Like this.

Arica's wetland is a protected area.

Remember to keep your voice down.

to follow the indicated path.

and to put trash in the trash can.
