One or a few learning or take away point from the workshop

3D animation through Blender
Animation in ppts
This workshop is definitely fruitful for developing 21st century skills by using Technology Aided Learning tool in teaching learning activities.
We can make animations on various softwares.
It has ignited the desire to learn more about animations.
PPT ANIMATION, RENDER , SYNFIG, STOP ANIMATION ETC
3D effects in most of the things .
Making interactive animations with various incorporating technology in classroom.
Synfig, stop motion , Go through pipe ppt & certificate preparation.
The workshop helped us to understand the diversity of animation. It is not important that we always have to work in difficult apps to make animation with our creativity we can animate with simple things also.
Animation in PPT, Synfig studio, Blender and stopmotion app
Becoming an animator and developing e- content through animation is a lengthy process and it will take time to become proficient in that but atleast now we are in a position to start it.
New dimensions in power point
Workshop helped me to explore the unexplored part of animation and how it can leave impact on the learner

LEARNT NEW ASPECT OF THE ANIMATION AND HOW IT CAN BE UTILIZED IN THE EDUCATION FIELD BUT IT WILL BE INTERESTING TO LEARN HOW EXACTLY & EXTENT WE CAN DO THE GROUND LEVEL TASKS AND IT RESULT ANALYSIS.
TWO MAKE 3D ANIMATION
ANIMATED POWER POINT PRESENTATION.
Use of technology like animation certificate preparation
Learn new things Animation
Effective use of PPT and stop motion animation
Synfig, balender, stop motion etc.
Animation process on various platform like synfig, blender and very useful PowerPoint.
Animated pots
I will apply PPT animations for sure in my teaching pedagogy.
Animation & ppt
Animation in PPT's
Animation: How to Illustrate and Design for Successful Motion (Skillshare) ... Bender 2) Sinfiy vedio) Ball bouncing animation Hand-Drawn Digital Animation: Bring Illustrations to Life (Domestika) ... Mixed Media Animation in Procreate (Domestika
Designing & Writing Certificate easy way in short time span
We have learnt 2D &3D animation through synfig and blender softwares . In addition to this , we also learnt many more new features of Microsoft PowerPoint and worked on Stop motion studio too .This is going to be very beneficial for me as well as for children also .
Some features of Power point presentation
Animation can equip the teacher with a plethora of tools to provide multiple learning experiences to the students.
Animation is need of future Bharat, if one want to upgrade the education pedagogy then animation is perfect for that. Teaching learning will be fruitful using animations.
There are many take away of this 5 days workshop like learning new contents about power point, synfig studio and blender. Learning animation from special invites made us rich in content.
Certificates preparation, animation through PPT and most likely 'Stop motion studio app'
Animating in power point presentation, knowing the features of various tools of Synfig Studio, using these tools tool prepare dynamic 2D animation, use of Blender for 3D animation, stop motion mobile application, competitive spirit, teamwork like skills are learnt.
Different types of Animation through PPT and Synfig
Learned many things about animation, Usage of tools, software.
animation in our daily teaching learning process

How far the workshop helped you to prepare your teaching learning in the classroom? Your impression of the Workshop.38 responses

My expectations were high that I will learn 3D animation. Yet what was learnt from Mr Kaushal session will definitely be tried to implement by animating few chapters
Very good
It will make our teaching learning practice very interesting
Helpful to make animated e contents according to lesson.
Very Helpful.
It was something advance, I grasp as per level. It's more helpful to make ppt live and impressive and attractive.
I may say 60% I will be able to use all these things in my teaching learning process.
Making teaching interactive and unique learning experiences.
Learn a lot to prepare ppt with animation.
This workshop have helped me in understanding the course of method and the process of making e-content in diverse ways. This workshop have helped me a lot.
Workshop will be useful for preparing PPT like teaching aid.
It has made me more proficient in making animated PPT
I van utilise knowledge gained here in my day today teaching learning
It motivated me to be more creative and equipped me with so many apps that can help me to transact my lesson in an impactful way.
JUST BASICS OF ANIMATION AS FAR AS SYNFIG AND BLENDER ARE CONCERNED. PPT DID MAKE CONFIDENT ENOUGH TO PREPARE SUITABLE CONTENT WHENEVER REQUIRED.

We can make 3d and 2 d animation using the blender and synfig and helpful for to expalin objects
Animated ppt, videos would be definitely worth full in teaching learning process in class room.
Use of technologies in easy way
It becomes our teaching effective
It is really good idea to implement animation in education process. But it requires free autonomy to teacher and less burden of other works.
Very much helpful during teaching learning process.
It is helpful to me for my classroom interaction with students. I only wanted that the animation apps need to explore more by its' tools and useful features. I only take very little part from the software and need help to use as per requirement of the Class.
Implementation of ppts
All sessions were amazing , but my favourite session was PPT animation taken by Harman Chura sir and it will be really really helpful in daily life teaching learning process.
Very good .
Very Good
Using animation enables students to visualise and understand complex subjects or processes. As well as simplifying messages and complex subjects, animation-based learning can also help improve learners' retention. Our brains can process visual information efficiently and quickly.
To prepare Animated PPTs and other 2D/3D animations with the help of software like synfig/Blender
This workshop is very helpful in making e-resources . Content that will be prepared through the training sessions will be very interesting that will definitely enhance our teaching learning process . This will be a great step towards the use of ICTs in our daily classroom.
It helped making me making myself a better techie
It will be helpful to plan the classroom teaching learning in more effective ways
Now I can use animations in PowerPoint presentation and show the animated 2D,3D shapes using Synfig and blender.
The world is changing so fast and teacher has to be changed as per the need of hour so learning animation can help in creating content for primary students. as we all know that students particularly primary students like to have animated videos and content so this workshop helped us to move in right path.
Use of 'stop motion studio' will be more feasible and useful for me to use.
This workshop turn out to be very interesting. Synfig studio, Blender and PPT can do wonders and using these software applications we can work on hands-on animation projects to apply our knowledge in creating e-resources
Very much helpful in teaching learning process
It will help in making e-contant for topics.
It is the most amazing tool to enlight our teaching learning process

कार्यशाला में आने से पहले और कार्यशाला में प्रतिभागिता करने के बाद अपने क्या महसूस किया ? विस्तार से समझाइए । What did you feel before and after attending the workshop? Explain in detail.

38 responses

I was excited to learn 3D anil,what ever little I could carry will be implemented.
Now I am very comfortable to prepare ppts
This type of courses are required to make teachers techno savvy
I do not know about animation before attending this workshop but now I am able to make animation accordingly as I learnt during the fruitful sessions of 5 day workshop on animation.
Before workshop I got scared as I am not so good in computer but the way the workshop was planned it was with the pace of students.
It's wonderful experience to meet different skilled people and learn and share our idea. It's enhances my knowledge and Faculty especially Harman sir is very helpful and easily transact all the matter and cater the need of participants. So thanks for arranging such course.
I feel that now I am aware about most of the things of ppt, blender, synfig and animation tool.
Most insightful and helpful.

I was feeling uncomfortable before attending the workshop because I wasn't aware with animation. How it is prepared. Now I learn basics about animation. Only practice is needed to become comfortable.
Before workshop I was in doubt with the implication of the purpose.But after workshop I understood how much important it is to change our pedagogy with time and with advancing technology. I am sure in future,we all will be able to make our own content according to the needs of our students and will not depend on others online content.
Before attending this workshop I used simple PPT without animation but now I would be able to use different animations in PPT to make joyful learning.
There is so much to learn ,everyday and every moment.Kvs has been giving us the opportunity to keep ourselves updated with the recent developments in the field of education
So many new things about animation
I feel more motivated to be creative and experimental.
BEFORE ATTEDING HAD VERY MUCH EXCITEMENT OF ANIMATION AND ITS IMPLEMENTATION. AFTER THE WORKSHOP FOUND CONFIDENT IN PPT WHILE SYNFIG, BLENDER, ETC. WILL REQUIRE FAR GREATER WORK AND PRACTICE.
we feel now make draw anything and our interest is created to make animation and 3 d objects .
कार्यशाला में आने से पहले ऐसा लग रहा था कि यह बहुत उबाऊ होगा। लेकिन कार्यशाला के doiranair संपन्न होने के पश्चात यह बहुत ही उपयोगी और आनंददायक साबित हुआ। इसके लिए ziet मुंबई का बहुत बहुत आभार।
To prepared my self in confident way
Go in new field for teaching
This was my first workshop in my career. It was goog.
I have not any idea about animation before coming this work . Now I am able to do something new.
I am always excited to visit the ZIET Mumbai because it increases my knowledge as well as my curiosity to learn and update myself. Before this workshop I forget the animation and its' requirements. After the workshop, I learn the many features of PowerPoint presentation as well as synfig and blender. Thanks to KVS, ZIET Mumbai and Harman Chhura SIr. Specially Chhura will always inspire for countinousely learning and do more for the students. It is more interesting than my expectation.
Improved
It is my first workshop in ZIET Mumbai , i was very nervous in the beginning , but when i met our mentor Harman sir my nervousness converted in excitement. He is very talented and a very good teacher too , whatever was taught in the sessions, everything was super exciting.
Improve a lots
Improved a lots.
Before the animation workshop, I dont have idea or knowledge about animation bout now I have so many ideas about animation
Before coming in this workshop I had a little knowledge about animation but after participating I inhance knowledge about preparing Posts & Animations
Before attending the workshop, I was quite excited as this kind of workshop was a challenge for me . I have never attended such workshop before . After attending this workshop, I am happy that it had full filled all my expectations. I have learnt a lot of new things here that I will definitely going to implement in my class . Also this is the first time , I came to KV Mumbai Ziet , I will definitely love to come here again for such kind of interesting workshops . Overall it's a very nice experience.
Good
Got equipped with many skills related to animation which will help in designing the e resources in an effective way.
Earlier I didn't know about the animations in PowerPoint presentation and even didn't not know about Synfig and blender.
Generally i don't like to participate in such workshops due to long and boring sessions but first time I felt that a workshop can also be entertaining and interesting. During the workshop all the participants were busy with their laptops making animation and completing the given tasks.
High expectations from the workshop about video animation. Today I feel my expectations fulfilled upto 50 percent.
Before attending the workshop I was aware about PPT and it's features. After the workshop I am amused with the knowledge of different software which will enable me to create e-content for

different topics. initially I was very apprehensive but with the days passing, the training that was provided made me confident in using the new tech based software and applications.
Before I hv very less knowledge about Synfig and blender but now able to do some work.
आने से पहले एनीमेशन के बारे में इतना ज्यादा कुछ पता नहीं था। था वर्कशॉप के दौरान काफी जानने को मिला। जो सॉफ्टवेयर का उपयोग कर रहे थे उसके बारे और ज्यादा उपयोग पता चला।
I feel elated as new concepts to me

यह कार्यशाला अन्य कार्यशालाओं से किस प्रकार भिन्न है जिसमें आप ने भाग लिया ? How is this workshop different from other workshops you have attended earlier?

Animation workshop was first in series
Construcrive approach
This workshop was completely practical based approach so everyone got hands on experiences.
It was totally practical and ICT based.
It was to the point demonstrations.
It's totally tech based programme and it's must need necessary items like advance and latest mode laptop and window with internet facility and must have basic knowledge of Ms office. So it's totally different from other course.
This is more practical as compare to other workshops. Definitely I would like to implement these practices.
Focused on animations fully.
This workshop is completely related with computer.
I am happy it was my first workshop.I enjoyed it thoroughly.
This workshop is fully technical than those of previous.
This was a hands on experience and we enjoyed it.
This is very practical based less theory more of practical
It was more practical then the previous ones
IT IS COMPLETELY APPLICATION CUM IMLEMENTATION BASED WHILE OTHERS HAD MORE LECTURES. BOTH HAD ITS OWN ADVANTAGES AND DISADVANTAGES.
this workshop is totally practical base and easy to understand and interesting . it is helpful create e resources and classroom e resource.
इस कार्यशाला में सबके पास अपना अपना लैपटॉप था और सीखने का व्यक्तिगत अनुभव रहा।
In this workshop everything is practical
It is totally e learnings class
More tecnology is used in this workshop
It work shop give
I think, this workshop is totely based on hand to hand practicle work. I never attended such type of workshop where candidates are engaged in every period with their interest. No one wants to break in the period. There is no lecture for boring the candidates. Such type of workshop increases the interest towards the update myself and learn new things for my dear students.
Activity based
It was totally based on PRACTICAL APPROACH.
Use different & new technology
Use different Technology ? Software
ऍनिमेशन कार्यशाला सीएसएस गुणों के एक सेट का एक कस्टम एनीमेशन करती है। यह विधि सीएसएस शैलियों के साथ एक तत्व को एक राज्य से दूसरे राज्य में बदलती है। एनिमेटेड प्रभाव बनाने के लिए सीएसएस संपत्ति मूल्य को धीरे-धीरे बदला जाता है।
Yes,this was almost practical based traning.
I haven't attended such workshop before. This is completely practical based workshop.Througout the sessions , we kept on experimenting different things . It's very interactive as well as interesting for us .
It is more practical than other theoretical workshops
It gave more opportunities to do practical than other workshops.
This workshop was so fruitful. I didn't get bore at any point during this workshop. We all were eager to know more about animation.

This workshop was completely different from other workshops I have attended because first time I felt that spending 5 days in a workshop can be interesting and joyful.
Totally practical
Previously I attended only online training/workshops which is all in together different from face to face workshop, Attending face to face workshop is better than the online training as queries may be asked and sorted then and there only and also participants remain active in face to face workshop. Also this is technology based workshop so it improved my skills on laptop.
Practical experience we got.
इसमें मेने अलग अलग सॉफ्टवेयर ला उपयोग सिखा।
it is purely practical

कार्यशाला के दौरान आपके क्या आंतरिक परिवर्तन महसूस हुआ एवं उसे अपने कक्षा में उतारना चाहेगें ? What are the changes you have noticed in you after attending the workshop and you would like to actually implement in the classroom?

38 responses

I learnt Blender
Ready create new things in ppts
Developed interest in developing animation as a learning tool.
Yes I will try my level best to make animated content for a lesson(s) accordingly.
I got the confidence that even I can prepare E content through animations.
I make my ppt without any animation So now we can put animation and it's transition and some more things to make attractive and impressive and live. I will try my level best to add these things in my teaching practices
Definitely I would like to use these practices in teaching.
Fantastic way to engage, empower, educate and inspire people of all ages and abilities and allow them to creatively express their ideas while learning many invaluable skills.
PPT with animation should be shown in the classroom. Teachers should prepare PPT with animation
I have learnt how to be innovative, curious, explorative and have positive attitude to be animator and I hope to inculcate all these in classroom to make teaching learning process lively.
I will use animations in PPT for presentation in classroom.
I will incorporate the things learned here, in my class room.
Power point presentation with animation
I feel more equipped after the workshop and would like to explore more further
WILL LOVE TO SEE THE RESULTS AFTER IMPLEMENTATION
yes, we will try my best to use that i learned here.
Animated ppt, videos would be definitely worth full in teaching learning process in class room.
I more attached to technology
Yes
Use of ICT
Yes I got many ideas and I will implement it in to the class room activities .
The mind set toward the new scheme of education for young ones. Definitly I want to use this technique into teaching-learning process to achieve the gaol of my subject.
Confidence
I have become more technosavy.
Animated classroom
Animated PPT's / Animated Classroom Yes.
Using animation enables students to visualise and understand complex subjects or processes. As well as simplifying messages and complex subjects, animation-based learning can also help improve learners' retention. Our brains can process visual information efficiently and quickly.
Try to use animated e content related to chapters.
I am now excited to explore more in the softwares taught to us . I will implement this in preparation of e content that will keep excitement in my children as well as in me .
Knew some good features of ppt
Knew the unexplored features of power point
Earlier I present simple PowerPoint presentation. Now I can use animation in my powerpoint presentation. Also I can present 2D, 3D animation using Synfig and blender in classroom transaction.

This 5 days workshop on animation made me more fluent in using power point which i generally use to create contents for primary students. The best part of this workshop is how to generate number of certificates or ID cards in very less time.
Creating animation using Stop motion studio app.
Primary kids are very inquisitive and different kids have different span of attention. Chalk and talk method need to be replaced with technology based teaching learning process and so this workshop will surely be helpful in creating animated videos for children that will create interest among children related to topic.
Positive approach towards ICT.. easily can do the work...
अधिक से अधिक एनीमेशन सॉफ्टवेयर का उपयोग करने से पढ़ने का विषय त्यार हो सकता है।
I would like to use my daily lesson

प्रशिक्षण के दौरान सिखी हुई विभिन्न एनिमेशन तकनिकी अपने कक्षा में लागु करने में आपके सामने क्या चुनौतियां आएंगी ? What challenges you foresee in implementing the learning of this training programme in your actual classroom?

38 responses

Will try to use blender
Lack od time to prepare animated ppts
As my mobile data used to get exhausted in the beginning of each day of workshop so found difficulty for browsing internet for downloading latest softwares and others required content.
It will take a time to develop animated content and need to be guidance on various steps while implementing the learnt aspects in classroom.
I need to learn more about synfig and blender softwares. More practice will make me a good animator.
1. Diff background of students 2. Laptop and internet 3. Advance windows 4. Language issue 5. Parents sometimes support and sometimes not. 6. Less interest of parents and students to Provide necessary equipments etc
