

Pika Release Notes 2018.07.0

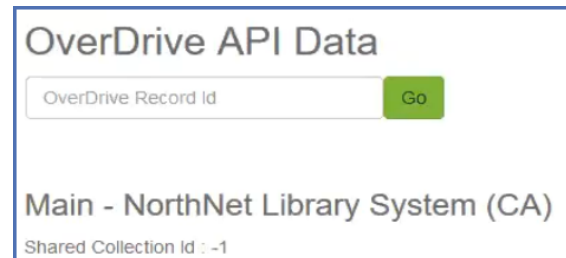

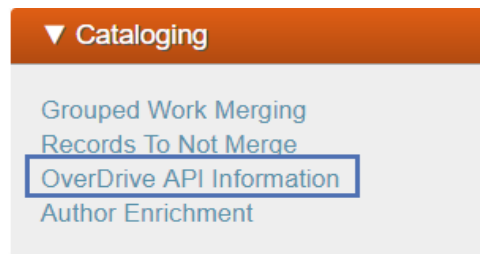

Released August 9, 2018

New Functionality

- Sacramento Public Library Implementation
 - Site visit in mid-July
 - Spun up production server
 - DNS entries created - sites directing out to correct URLs
 - Still finalizing indexing, record displays, facets, and configurations
 - Overdrive integration for multiple accounts in single consortium
 - Indexing for multiple collections.

- Patron interactions happen through the correct shared collection
- OverDrive API Information Page

- Discovered configuration settings that are now obsolete
 - Will likely be removing some values from the configuration pages
- Completed initial themes
- Expanded automatic eContent suppression to hide Overdrive records in the ILS
- Improved handling of ILS eContent records
 - Econtent source determination
- Hold placement for single-item bibs with item volume information
 - System will now place hold on standalone item with volume information instead of prompting the user to choose an item

- Moved Arlington suppression settings out of hard-coding to Indexing profile

▼ Suppression Settings (ils profile only)

▼ Item Level Suppression Settings

☒ Use iCode2 suppression for items

ICode2s To Suppress (use regex)

- We will do this for all Discovery Partners at some point, as the situation dictates
- Self Registration and PIN resets for Anne Arundel
 - Made allowances that should mitigate need to make changes as Sirsi ILS changes values -- long term fix
- Format displays improved
 - Formats now look to language present in multiple 250 and 538 MARC fields
 - 4K Ultra HD Blu-rays
 - Nintendo Switch
 - Nintendo DS
