Vernon, NJ — On Sunday, May 1, 2022 Vernon Township High School's Environmental Club, The Green Team, run by science teacher Cara Brown, hosted a Tree-Plenish event. Tree-Plenish is a student-led 501(c)(3) non-profit organization to make schools more sustainable.

The VTHS Green Team was able to exceed their goal of planting 100 trees in order to offset **1.0 million** sheets of paper usage. This was accomplished by residents of the community that purchased the trees. In addition to helping distribute the trees, students also helped plant several across Vernon. This event not only provided an opportunity to better the environment but also helped connect resident to the community and school district.
