

This project will consist of 5 separate steps aimed at finding ticks for an i65 frag movie:

Step 1: Watch the stream and note down any highlights you see. Write down the matchup, make a short description of the highlight and make a clip of the action. Use this format:

Se7en vs Ascent NA Badlands <optional logs.tf link>

Kaidus pogo into medic airshot <clip link>

Step 2: Calculate the tick based on the map timer.

How to convert time into ticks:

Note how much time has elapsed in the map (not how much time is remaining). If the timer says 8:25 it means that 8:25 is remaining and that the game has been going for 21:35, so write down 21:35

(minutes * 60 * 66) + (seconds * 66) = Tick

Example: 6:27 → (6 * 60 * 66) + (27 * 66) = 25542

Feel free to round down to the closest prior 500, f.ex. 6:27 = 25542 = 25500

<http://web2.0calc.com> or <https://www.desmos.com/scientific> are decent online calculators

Step 3: Acquire and organize all of the demos. They will probably be made available for download at <http://demos.igmdb.org/> once I've sorted them

Step 4: Watch the remaining demos and note down ticks of any highlights

Step 5: Double check that the calculated ticks are correct and make sure that the demo names are consistent with what we have written down in the document.

Day 1 - Invite Group

Faint Gaming vs Ascent.eu Process <http://logs.tf/2357385> **Missing demo**
