

After Your ESSL Virtual Field Trip

Before your ESSL virtual field trip you visited the choice board of activities that introduced you to chemical and physical changes. Then you visited the ESSL virtually! Now it is time to take all you have learned and complete this task! How can you share what you learned with others! You have been given a job by FCPS to create a way to share what you learned with other students in the county! How will you do it? Use the options below to help you create your own way of teaching science to others! We can't wait to see what you do!

Create a poster, picture or comic strip explaining chemical and physical changes

Create a billboard teaching people about chemical changes!

Create a song/rap or poem explaining the difference between chemical and physical changes.

With the help and permission of a parent try out some physical and chemical changes.
