

Lust Legion Walkthrough

Disclaimer: We are writing this guide because many players have had trouble progressing through certain quests. Many of these quests may change from update to update, or even be completely reworked, as is very likely to happen, since we are writing this guide while working on the post-0.11 story revamp.

To be safe, please read the message below to make sure this guide is up to date with the latest update.

- **Current version of the guide: Lust Legion 0.11**

During the game's quests, you may notice two icons appearing in certain dialogue choices.

The icon on the left represents the **sub** path, meaning you have chosen submissive responses.

The icon on the right represents the **dom** path, meaning you have chosen dominant responses.

This will be very important throughout the game, as it will allow you to unlock exclusive scenes, different scene variations depending on whether you're on the sub or dom path, as well as unique dialogue options.

You may also come across the same icons, but with multiple "+" symbols. This means that the response you chose has given you more than one dom/sub point.

NOTE: This guide will help you through completing all the quests, but to unlock all the scenes, it's up to you! Choose carefully your answers during the dialogues.

Also, the quests are sorted by character, and not by timeline, which means that you might have to do other quests before you can continue with a character.

Reyes

- You'll have to make her know you're back. You'll find her inside your house, upstairs and by clicking the right door (the one with the hearts). This will lead to a scene and you're going to choose your name.
