Remember, If you don't sacrifice for your dreams, your dreams will become a sacrifice.

This is weird, but interesting! If you can read this, you have a strange mind too. Can you read this? Only 55 people out of 100 can. I don't believe that I could accidentally understand what I was reading. The phonetic power of the human mind, according to a research at Cambridge University, it doesn't matter in what order the letters in a word are, the only important thing is that the first and last letter be in the right place. The rest can be a total mess and you can still read it without a problem. This is because the human mind does not read every letter by itself, but the word as a whole. Azanmig huh? Yeah and I always thought spelling was important! If you can read this forward it

To those who get in the way of my ships: beware.
