

Project ID: YW-2015-0028

Project Description: Optimize flow protection and augmentation

Reason for Project: Optimize flow protection, ecosystem needs, recovery of endangered fish species and other non-consumptive attributes. In the context of the Yampa PBO and development of the White River PBO, consider updated calculations of existing and new depletions; potential storage obligations and opportunities; aquatic habitat resilience; and non-native fish and invasive vegetation proliferation.

Project Status: Implementing

Lead Proponent: The Nature Conservancy, Fish & Wildlife Service

Lead Contact: N/A

Estimate Cost: \$ 50,000.00

Water District: N/A

Project Key Words: Watershed, Health, Environment & Recreation

Estimate Yield: N/A

Water Right Needed: N/A

Latitude/Longitude

Funding Sources:

Schedule:

BIP Obj. Addressed: Quantify and protect environmental and recreational water uses, develop an integrated system of water use, storage, administration, and delivery to reduce water shortages and meet environmental and recreational needs

Needs & Next Steps: Continue discussions amongst various stakeholder, the Division 6 Water Engineer, and multiple reservoir/ water supply operators to achieve the best net result for the multiple non-consumptive needs identified above while continuing to meet the consumptive needs of water users.
