

The Arcanon Project

Arcanon, the most unique Minecraft server-project ever.

"Let's build a community, and show them what Minecraft really is capable of!"

What is the project?

Arcanon is an incredibly unique Minecraft server-project. It is completely community-driven and our goal is to really show what Minecraft is capable of! This all without the use of any mods. Imagine a massive community of motivated people, that are all up to explore a new game within Minecraft, that everyone can enjoy!

In this document, you will learn what Arcanon exactly is. Also you will be able to join the project in order to help bring it to life!

1. What is the server?

Gamemode:

Minecraft itself is much fun, especially multiplayer. Sadly, most of the multiplayer gamemodes have become boring, because they are not new and unique anymore. Arcanon provides a brand new combination between two unique gamemodes:

MMORPG, and custom survival + exploration

Players want something new, we bring it to them. Everyone plays through an immersive storyline filled with quests, monsters, bosses, classes, skills and more. Next to this MMORPG, there will also be a custom generated survival planet featuring custom biomes with custom ores, plants and monsters to find on your path. This combination will bring every player satisfaction for their interests.

The server's gameplay and features are mostly inspired by the popular side-scrolling MMORPG called 'MapleStory'. Within Minecraft, WynnCraft and Desteria are also used as inspiration.

Brief Gameplay Description:

The player follows a storyline set in a universe called Ardis. The story takes place on Arcanon, a planet which has been conquered by the dark army from the other big planet from Ardis: Helios.

After creating a character using the unique player profile feature, the player finds himself following a unique and interactive questline which involves more never seen before features. The player chooses a class featuring epic skills and statistic. There will be progression through the world of Arcanon, and the possibility to explore at the survival planet: Alysium.

This planet was found by Arcanon, and they are using it to reinforce. This planet is a custom generated world featuring custom biomes with custom ores, plants and monsters to find on your path. The new items give the player the possibility to build whole new workbenches and machines. These allow the player to build new items such as scrolls, furniture, potions, food and not to forget spaceships.

These can be used to explore the universe of Ardis and its numerous wonderful planets. Some of the visitable planets can be used for survival: they contain useful and rare resources. Others are for MMORPG purposes: they have even more storyline, quests and boss fights to discover.

Next to the fundamentals of the game, there are loads of options for customization. Players can truly show who they are, and more important: who they want to be. The server is not pay-to-win, neither is it pay-to-play. However there are donation-options in a store, which will provide various goods, cosmetics and advantages.

Inspiration-source from Maplestory; an example of what the universe will look like

2. Why Minecraft?

Who doesn't love the game? The creativity and possibilities are endless! With its multiplayer options, Minecraft is a great platform to collaborate on.

Lost players

Sadly, the game has slowly been losing popularity over the past few years. This is simply because of one major reason: it is not unique anymore to players. They have played every common gamemode by now; they want something NEW!

The arise

However, 2019 has been said to be the year of Minecraft's big return! YouTubers are returning to the game, and people are finding themselves re-exploring Minecraft's beauty. Statistically spoken, Minecraft is finally regaining popularity!

MMORPG + survival

People have always loved survival; it's the base of Minecraft. With a unique twist, players will have so many new objectives. Therefore survival will be interesting again!

MMORPG is the most unique Minecraft experience possible. Also it's extremely popular, and gaining more popularity really quick! Just look at the popular Minecraft server 'Wynncraft'.

3. How can you contribute?

"Do you like Minecraft and uniqueness?"

Join the project and let's create something to be proud of!"

A lot of people are required to make Arcanon come to life. There are a few different positions within the Arcanon team. Since Arcanon is a community-based project, most positions will only be voluntary. However payment is open for discussion. If this is the occasion, it will be specified at '*recruitment*'. You can join a position by filling in the form when clicking '*open*', or sending **IkJurre#2413** a message on Discord.

Owner: the owners/founders. Their word is final on all game related decisions.

Recruitment: only recruited on special occasions, if interested please contact.

Manager: directly helps the owners. They manage tasks, processing and staff.

Recruitment: **CLOSED**
