Decision Making & Heuristics

Instructions

Watch the video about bundles.

This bundle was created to edify and support your research interests. Recommended resources have the first word of the reference highlighted with light text over a dark background (e.g., Akbarian).

Key words: adolescent; AI (artificial intelligence) + decision making: attention control + decision making; conflict + decision making; decision making; choice; decisions; decision making; decision-making; decision making + neural correlates; heuristics; human-AI interface + decision making; impaired decision making; irrational decision making; mental illness + decisions; motivation + decision making; motivational networks + decision making; neural biology + decision making; nudge; perception + decision making; moral + decision making; prior experience + decision making; prosocial + decision making; regret + decision making; reinforcement learning; risky + decision making; steps in decision making; unconscious perceptual processing + decision making

Some of the links go to research paper vendor sites with just the abstract available. To read the full article, sign in to HOLLIS Library and do the title search there.

If you wish, you can download this bundle.
