1. Introduction

Reptn ("we," "us," or "our") is a local-first iOS utility for pet owners to log estrus (heat) cycles and plan neuter or spay decisions. This Privacy Policy explains what information the app handles, how it is used, and your choices. By using Reptn, you agree to this policy.

Reptn does not require an account, does not operate a social feed, does not provide veterinary telemedicine, and does not upload your pet diary to our servers.

2. Information We Collect

Reptn collects and stores only the information you choose to enter or create within the app. This may include:

- **Pet profiles:** name, species (Cat, Dog, or Other), and optional breed notes
- **Cycle Pad logs:** estrus phase, intensity, symptom chips, text notes, dates, and locally estimated phase labels (for display only, not medical diagnosis)
- **Neuter Guide data:** checklist progress, item notes, decision timing selections, and questions for your veterinarian
- **User-created media:** up to four photos per cycle day, photos attached to checklist items, and voice memos recorded in the app
- **App preferences and local records:** display name, first-launch consent acceptance flag, Paw Coin balance, free-export usage counters, export spend ledger, saved export archive metadata, and in-app purchase fulfillment records used to prevent duplicate coin credits

We do **not** collect your email address, phone number, precise location, advertising identifiers, or analytics data through Reptn. We do not use third-party analytics, advertising, or tracking SDKs.

3. How We Use Your Information

Your information is used solely to provide app features on your device, including:

- Displaying and editing cycle logs, neuter checklists, and pet profiles

- Playing back voice memos and showing attached photos
- Archiving entries in Care Vault and maintaining export history
- Rendering and saving export summary cards to your photo library when you confirm an export
- Managing optional Paw Coin balances, free allowances, and export spend records

We do not use your data for advertising, profiling, automated medical decision-making, or selling data to third parties.

4. Data Storage

All app data is stored locally on your iOS device.

- Structured diary data, settings, coin balance, free-use counters, and ledgers are saved in on-device app storage ([SharedPreferences](#)).
- Photos and voice recordings are saved as files in the app's private documents directory.
- Exported summary images are saved to your device photo library only when you confirm an export.

We do not maintain cloud backups of your diary content. If you delete the app or erase your device, locally stored Reptn data—including Paw Coin balances and spend records—is removed unless you have separately saved exports to Photos or another backup method.

5. Device Permissions

Reptn requests iOS permissions only when a feature needs them:

Permission	Purpose
Camera	Capture pet photos for cycle logs and neuter checklist items
Photo Library (read)	Attach existing photos from your library
Microphone	Record voice notes about cycle symptoms and neuter planning
Photo Library (add)	Save exported cycle summary cards and neuter decision sheets

You may deny any permission; the related feature will not work until permission is granted. Reptn does not access permissions in the background for unrelated purposes.

6. Third-Party Sharing

We do not share, sell, rent, or disclose your personal or pet diary data to third parties.

Reptn has no user accounts, no backend servers for diary content, and no integrated analytics or advertising SDKs that receive your logs, photos, or voice memos.

The only third-party service involved in normal use is **Apple** when you make an in-app purchase. Payment and receipt validation are handled by Apple's App Store; we do not receive your payment card details.

7. In-App Purchases

Reptn offers optional **consumable Paw Coins** processed through Apple's In-App Purchase system. Coin purchases:

- Are charged to your Apple ID account
- Credit a local Paw Coin balance stored on your device
- Are used only for optional premium actions after free allowances are used:
 - Cycle Summary Card exports (after 3 free exports per calendar month)
 - Neuter Decision Sheet exports (after 1 free export per pet)
 - Additional voice memo slots (after 10 free active voice memos app-wide)
- Do not unlock core logging, editing, checklist, or media attachment features, which remain free

Purchase transaction identifiers needed to prevent duplicate coin credits are stored locally on your device. We do not upload your purchase history to our own servers.

Consumable purchases cannot be restored after app deletion because balances are stored locally. For billing or refund questions, contact Apple Support.

8. Children's Privacy

Reptn is intended for pet owners and is not directed at children under 13. We do not knowingly collect personal information from children. Because all data stays on the user's device and we do not operate user accounts, we do not receive identifiable child data through Reptn.

9. Data Security

Because your data remains on your device, its security depends largely on your device protections (passcode, Face ID, Touch ID, and iOS system security). Reptn stores files within the app's sandboxed container and does not transmit diary content over the network.

No method of electronic storage is completely secure, but we design Reptn to minimise off-device exposure by keeping personal pet data local.

10. Your Rights and Choices

You control your data within the app:

- **Edit or delete** cycle entries, checklist items, voice memos, and photos through in-app actions
- **Manage pets** and update your local display name at any time
- **Revoke permissions** in iOS Settings; denied permissions limit only the related features
- **Stop using purchases** without affecting free logging features
- **Remove all app data** by deleting Reptn from your device

Because we do not hold your diary on our servers, we cannot retrieve or export data on your behalf after device loss. Saved export images in Photos remain under your control.

11. Changes to This Policy

We may update this Privacy Policy from time to time. The "Last Updated" date at the top will reflect the latest revision. Material changes will be made available through updated in-app links or App Store listing information. Continued use of Reptn after an update constitutes acceptance of the revised policy.

12. Contact Us

If you have questions about this Privacy Policy or Reptn's privacy practices, contact us at:
