

Title of your Agriscience Project: What Effect does the Nitrogen Fertilizers have on the Water Table

Picture of your Project:

Detailed Explanation of Your Project (350 Characters or 50-90 words): The purpose of this study is to see the effect of agricultural nitrogen on water quality. In my project I will see the effect of agricultural nitrogen on water quality I filled containers with water, added fertilizer to one of the containers and one without. My results showed that the fertilizer constantly lowered the PH levels in the water.
