

Privacy Policy

Effective Date: June 11, 2026

Company: InanLabs

Contact: atacorp50@gmail.com

App Name: PDF Converter, Viewer & Scanner

InanLabs (“we”, “our”, or “us”) operates the PDF Converter, Viewer & Scanner mobile application (“the App”). This Privacy Policy explains how the App accesses, uses, stores, and protects information when you use our PDF tools, document scanner, OCR, PDF viewer, converter, editor, and file management features.

By using the App, you agree to the practices described in this Privacy Policy.

1. Information We Access or Process

The App is designed to provide PDF tools directly on your device. Depending on the features you use, the App may access or process the following types of data:

Files and Documents

The App may access files, images, PDFs, scanned documents, and other documents that you choose to open, import, scan, convert, edit, save, or share.

This may include:

- Images selected for Image to PDF conversion
- PDF files selected for viewing, merging, splitting, compressing, reordering, watermarking, signing, password protection, or conversion
- Camera scans created through the document scanner
- Text extracted through OCR
- Output files created by the App

These files are used only to provide the requested PDF and document processing features.

Camera Access

The App may request access to your device camera to scan documents and create PDF files. Camera access is used only when you use scanning features.

Photos and Media Access

The App may request access to photos, images, or files on your device so you can select documents or images for PDF creation, conversion, editing, or sharing.

OCR Text

When you use OCR features, the App may process images or scanned documents to recognize text. Recognized text may be displayed in the App so you can review, edit, copy, export, or save it as a PDF.

App History and Local Records

The App may store operation history, recent files, file names, output paths, processing status, dates, and related local records so you can access previous actions and documents more easily.

2. How We Use Information

We use accessed or processed data only to provide the App's functionality, including:

- Creating PDF files from images
- Scanning documents using the camera
- Viewing PDF files
- Converting PDF pages to images
- Performing OCR text recognition
- Merging PDF files
- Splitting PDF files
- Reordering PDF pages
- Adding new pages to PDF files
- Compressing PDF files
- Adding or removing PDF passwords where supported
- Adding watermarks to PDF files
- Signing PDF documents
- Saving output files on your device
- Sharing files through apps selected by you
- Showing recent files and operation history

3. Local Processing

The App is designed to process documents on your device where possible. We do not operate a cloud conversion server for processing your PDF files, images, scans, or documents.

Your files and generated outputs are stored locally on your device unless you choose to share them using another app or save them to a location controlled by another service.

4. Data Sharing

We do not sell your personal data.

We do not share your imported files, scanned documents, PDF files, images, OCR text, or generated documents with InanLabs servers.

Data may be shared only in the following situations:

- When you choose to share a file using your device's share menu
- When you save or upload files to third-party apps or storage services selected by you
- When required by law, legal process, or enforceable governmental request
- When necessary to protect the rights, safety, or security of users, the App, or InanLabs

Please note that when you share files with third-party apps or services, their own privacy policies and terms apply.

5. Third-Party Services and SDKs

The App may use third-party libraries or SDKs to provide certain features, such as document scanning, OCR, PDF viewing, analytics, crash reporting, advertising, or app platform services.

These third-party services may process limited technical data according to their own privacy policies and SDK behavior. Depending on the final app configuration, this may include device information, app performance data, crash logs, diagnostics, advertising identifiers, or usage-related data.

Examples of third-party technologies that may be used include:

- Google ML Kit for OCR and document scanning features
- PDF viewing or document processing libraries
- Google Play services
- Advertising, analytics, or crash reporting SDKs if enabled in the App

We recommend reviewing the privacy policies of any third-party services used by the App.

6. Permissions Used by the App

The App may request the following permissions depending on your device and the features you use:

Camera

Used to scan documents and create PDF files from camera captures.

Photos, Media, or Files

Used to select images, PDFs, and documents for conversion, viewing, editing, saving, or sharing.

Storage Access

Used to save generated files to your device and access files selected by you.

Internet

May be used for app services such as ads, analytics, crash reporting, updates, or other online services if included in the App. Core document processing is intended to work on-device where possible.

You can manage app permissions from your device settings at any time.

7. Advertising

The App may show ads. If advertising SDKs are used, they may collect or process certain data such as advertising identifiers, approximate device information, ad interactions, and diagnostic data to show, measure, and improve ads.

Ad data processing is handled according to the policies of the relevant advertising providers. You may be able to limit ad personalization through your device or Google account settings.

8. Analytics and Crash Reports

The App may use analytics or crash reporting tools to understand app performance, detect errors, improve stability, and enhance user experience.

Such tools may collect technical information such as device model, operating system version, app version, crash logs, performance data, and general usage events. This information is used only to improve the App and maintain reliability.

9. Data Retention

Files, generated documents, OCR text, and operation history are stored locally on your device unless you delete them, clear app data, uninstall the App, or choose to share/save them through another service.

If third-party services such as analytics, crash reporting, or advertising are used, their retention periods are governed by their own policies.

10. Security

We take reasonable measures to protect information processed by the App. Since the App primarily processes documents locally on your device, the security of your files also depends on your device security settings, operating system, storage permissions, and any third-party apps or services you choose to use.

No method of electronic storage or transmission is completely secure, so we cannot guarantee absolute security.

11. Children's Privacy

The App is not directed to children under the age of 13 or the minimum age required by applicable law in your country. We do not knowingly collect personal information from children.

If you believe that a child has provided personal information through the App, please contact us at atacorp50@gmail.com so we can take appropriate action.

12. Your Choices and Controls

You can control your information in the following ways:

- Deny or revoke camera, photo, media, or file permissions from device settings
- Delete generated files from your device
- Delete operation history or recent records if the App provides this option
- Clear app data from your device settings
- Uninstall the App
- Choose whether to share files with third-party apps or services

13. International Users

The App may be available globally. If third-party services are used, technical data may be processed in countries other than your country of residence according to the relevant third-party provider's policies.

14. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. When we make changes, we will update the effective date at the top of this page.

Your continued use of the App after changes are posted means that you accept the updated Privacy Policy.

15. Contact Us

If you have any questions, requests, or concerns about this Privacy Policy or the App's privacy practices, you can contact us at:
