

Need a background for simple game I make to get into the game industry. It's a minigolf game with only 2 levels and I need background images for the levels (brown area is the background).

Note: On the second level the eyes are following the mouse and it looks like a little wizzard(minion) that holds something (I tried my best to make it so). He would be happy if someone could give him a body in that background :D

- size of the whole thing is 640x360
- It should have "fun" feeling to it.

here is stage 1

and here is stage 2
