

Internship Description

Work Site Name	Department/Position
V Squared General Contractors	Construction Intern

Brief Overview of Internship
This internship is an excellent opportunity for someone interested in residential construction to gain practical, on-site experience. The intern will work directly on active job sites, supporting our project team while learning the fundamentals of residential building, project management, and construction operations.
Internship Tasks/Projects
• Assist crews with jobsite tasks (prep, cleanup, organizing tools & materials) • Shadow supervisors and learn project management practices • Help track progress with photos, notes, and reports • Support material deliveries, inventory, and scheduling • Participate in safety checks and quality control • Learn to read and interpret blueprints and construction documents
Internship Learning Goals (new skills/knowledge the intern will acquire)
• Gain practical, hands-on construction skills • Understand project workflows from planning through completion • Learn industry safety standards and proper tool use • Develop project management and communication skills • Build a small portfolio documenting work and learning
